## Flow rate

### Test report (with the 6ltrs/ min flow restrictor)

## SANS Specification applicable to single lever mixers:

### SANS specifications

SANS1480: 2005, edition 1.2 (\*\* specific extracts from the applicable SANS specifications and regulations to which such products will have to adhere to, to bear the SABS approved mark)

Operating pressure:

All single lever mixers shall be designed to operate on balanced water pressure

Performance characteristics:

Basin mixers = 12ltrs/ min maximum (with aerator)

Other mixers = 12ltrs/ min minimum (with aerator)

**\*\* The Cobra single lever basin mixers have an additional included water savings device, which reduces water consumption to 6ltrs/ min**
