

cobra aqua - salus domestic filtration system

Designed to save water, our most precious natural resource

Discerning, caring, committed

Cobra is committed to implementing strategic water and energy-saving initiatives to reduce the ecological impact of its operations. Our high-level team of experts continually monitor and develop cleaner, more efficient manufacturing methods. They research and develop state-of-the-art water systems, products and accessories designed to offer economical water usage and maximum energy saving benefits.

As a result of this ongoing product development, the Cobra Water Saving Collection brings you the Aqua-Salus domestic filtration system. The system offers a complete solution which is applicable to domestic households as well as industrial filtration, as the technology encompasses the water supply from ingress to drainage. The filtration system offers peace of mind in terms of removing chemicals and heavy metals as well as impurities and bacteria.

The Aqua - Salus filtration system includes a point of use drinking water three stage filter WM-POU-FILTER, tap WM-215-15, WM-970 mixer and a point of entry course filter WM-POE-FILTER. It is an ultra-efficient system which can be D.I.Y installed, requires occasional backwashing as well as filter servicing at 6 monthly intervals.
