

DOUBLE GLAZED ALUMINIUM WINDOW

Double Glazed Aluminium Window

The Double Glazed Aluminium Window is functional, safe and versatile! Designed to fit the standard 30.5mm casement system and in accordance with AAAMSA regulations this unique design not only reduce noise from the outside but climatise the house from the inside saving energy during the winter and summer months. The double glazed unit is manufactured from two 4mm TSG clear glass sheets and 6mm fill in gaskets, sealed with silicone to ensure the unit is waterproof. Windows are fitted with our standard friction stay and glazed with standard neoprene gaskets. The overall width of the unit is 14mm. The Double Glazed Aluminium Window is available in Natural Anodise, Bronze, white or can be colour powder coated on request.

Installation of the windows is easy and can also be done through DIY. The windows get supplied with fixing lugs that makes installation easy and are supplied fully glazed and only needs to be installed and plastered.

Improve your home today with high quality, double glazed folding sliding doors. Available in both standard and non-standard sizes.

Duro Aluminium double glazed range of folding sliding doors can reduce up to 90% of heat loss through your windows, ensuring the save of energy and cutting your heating bills. Duro Aluminium have now set the benchmark for high quality, high security, energy efficient double glazing products, making them affordable to everyone.

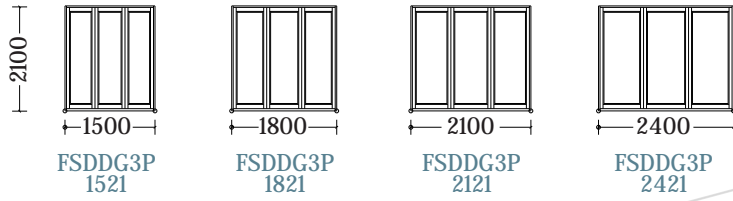

Using premium glass wall materials our double glazed folding sliding doors are manufactured to an unquestionable high standard with a vast range of sizes available. All folding sliding doors are supplied with double glazed units creating glass walls, weather proof seals and high security rated locking systems, making the doors perfect for any opening.

Effortlessly smooth folding sliding doors create a vast amount of unimaginable space along with inviting contemporary character and comforting glass wall ambiance to any ordinary room. As opposed to the limitations of traditional patio doors and French doors where openings are greatly restricted due to areas being closed off, a set of innovative folding sliding doors open up as far as your creative imagination takes you just imagine what you could do with that extra space created by a sliding folding door?

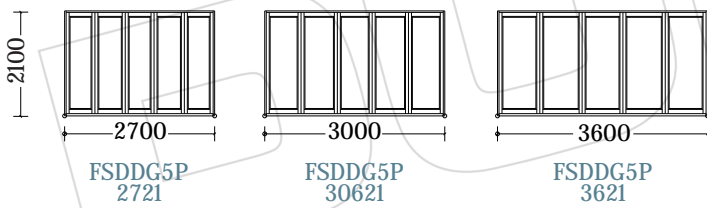

A set of folding doors can compliment any building and provide exciting glass wall solutions to many situations without harming the character of a building. With the ability of bringing inspiration and creativity into a home by transforming rooms into fashionable living areas, a set of folding sliding doors can remarkably blend spaces together, remove barriers between the outside and literally bring the outside in conforming to the natural environment around it. As opposed to patio doors, French doors, this folding panel, concertina door transformation creates wide and level access along with enhancing the structural character of a building and a glass wall allowing more natural light in making that ultimate difference to your home.
