Designed for life.

COMPOSITE DECKING

## With Eva-tech beneath your feet, building memories is easy

Embrace the possibilities of a world inspired by nature, where dreams can become reality. Eva-tech's composite solution fulfils your need for premium outdoor living through beautifully crafted, innovative applications. By providing decking, cladding, balustrading, pergola systems and accessories to match, Eva-tech is designed to invite the outdoors home. Whether it's converting a patio area into a dreamy deck, or transforming a lifeless wall into a masterful design feature; whether it's providing expert installation advice, or crafting decorative accessories, Eva-Last does it all.

### Lasting beauty

Thanks to its many benefits, Eva-tech gives you the peace of mind to sit back, relax and embrace your new outdoor living space.

- **LOW MAINTENANCE** – You'll never waste another second on sanding, treating or maintaining your deck – leaving you more time to appreciate the finer things in life.
- **DURABLE** – Not only is Eva-tech UV and moisture resistant but it won't rot, warp or crack. To prove just how sustainable Eva-tech's advanced technology is; our 10 year guarantee gives you the quality assurance to build your dreams on an enduring foundation.
- **SAFETY ASSURED** – Ensuring comfort and safety, our composite is splinter free and slip proof, ideal for outdoor occasions.
- **ECO FRIENDLY** – Our products are PVC free and harmless to the environment, satisfying your green conscience.

### Primary benefits

Very low maintenance

Moisture resistant

Slip resistance

Environmentally friendly

UV resistant

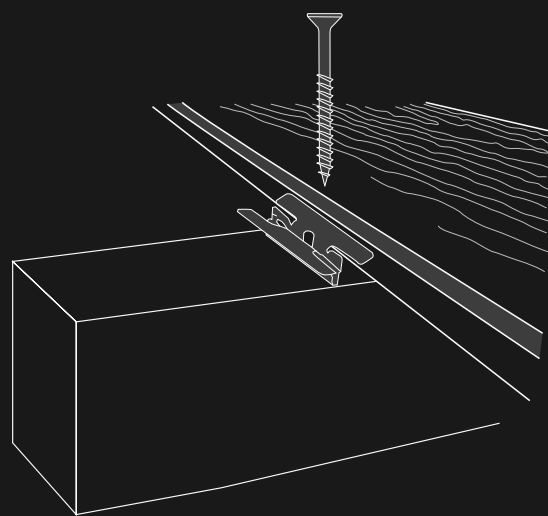

Weather resistant

## Design and style for life

Eva-tech is available in a diverse range of colours, finishes and sizes to cater for your desired style. With Eva-tech's range of solutions, creativity and imagination has no limitation.

## Fastening Eva-tech

The Eva-tech hidden fastening system is made from specially hardened stainless steel for maximum durability and strength. The system provides a clean finish with minimal surface screws and its intelligent design makes it a breeze to work with.

1. Halo clip

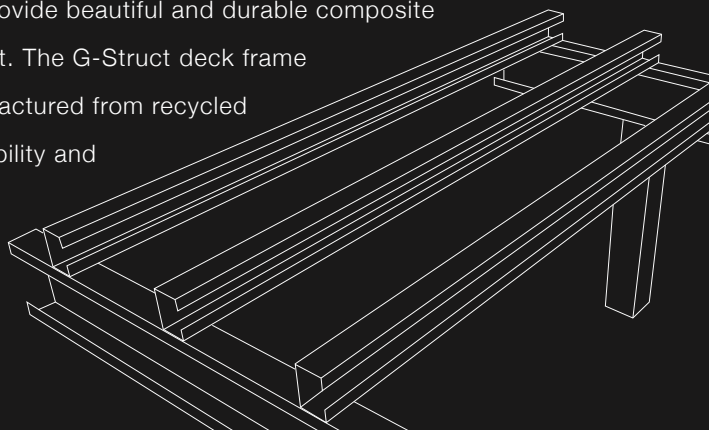

2. Starter clip

3. Locking clip

4. Decking screw

## G-Struct Framing System

Eva-tech building solutions cover all the bases; not only do we provide beautiful and durable composite products but we also ensure that their foundations are built to last. The G-Struct deck frame system from Eva-Last is a maintenance free frame solution manufactured from recycled steel. This system offers the highest performance in strength, stability and durability available for a deck frame. G-Struct ensures that your Eva-tech deck maintains a true level for life. With the Support of a G-Struct frame from Eva-Last, you are assured to be in safe hands.

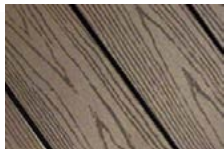

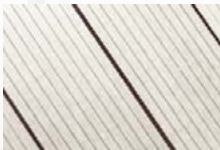

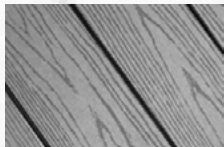

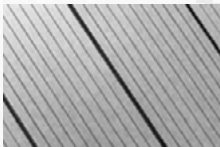

## ASCENT COMPOSITE DECKING

### COLOURS AND FINISHES

	TREAD	WYDE
ARUNA		
RUSTEAK		
MERBAU		
PEBBLE		
XAVIA		

Our legacy product Eva-tech Ascent was the first design in our extensive range and has made a lasting impression and continues to create the most desirable outdoor spaces. Ascent has a light weight hollow core design that is ideal for any deck which requires a low mass solution. It can also be integrated seamlessly with the Summit profile.

Dimensions	24 x 146mm (5,8m lengths)
Weight	3,60kg / Lm
Joist spacing	400mm on centres
Clips	25 clips / Sqm

Due to its high strength to weight ratio, Ascent is the ideal profile for cladding applications. It delivers great value for money, making it a popular choice for residential decks.

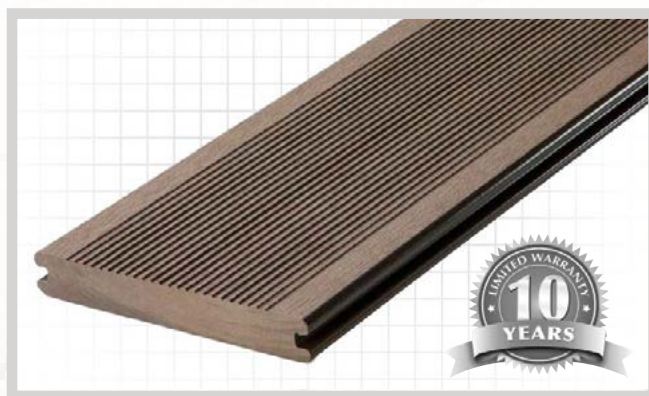

## CLASSIC COMPOSITE DECKING

### COLOURS AND FINISHES

	TREAD	RIIDED
ARUNA		
RUSTEAK		
MERBAU		
PEBBLE		
XAVIA		

The Classic decking profile is a superb alternative to hardwood timber. Classic is designed to emulate reeded timber planks commonly used for decking applications. The more streamlined dimension, and unique Riided finish gives this product a classic distinguished finish that resembles a popular narrowed plank design synonymous with decking solutions.

Dimensions	21 x 138mm (2,9m lengths)
Weight	3,75kg / Lm
Joist spacing	300mm on centres
Clips	25 clips / Sqm

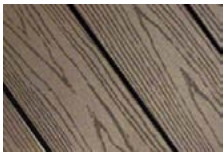

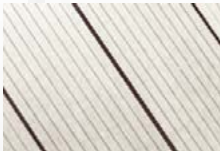

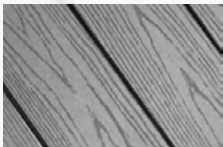

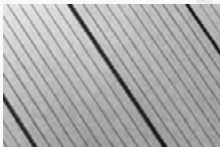

Classic's solid design makes it as workable as natural wood and is a favourite for decking novices and professionals alike.

## SUMMIT COMPOSITE DECKING

### COLOURS AND FINISHES

	TREAD	WYDE
ARUNA		
RUSTEAK		
MERBAU		
PEBBLE		
XAVIA		

When considering strength and stability, the Summit decking profile sets itself apart. The dimensions and weight of Summit elevate its performance to the top of its class. Summit has superior moisture resistance, load-bearing capacity and stability. Its service record is unrivalled in the extreme African climate. These properties make Summit the best choice available for any decking application.

Dimensions	24 x 146mm (5,8m lengths)
Weight	4,75kg / Lm
Joist spacing	400mm on centres
Clips	25 clips / Sqm

The Summit decking profiles strength makes it the obvious choice in marine, industrial, commercial and high traffic applications.

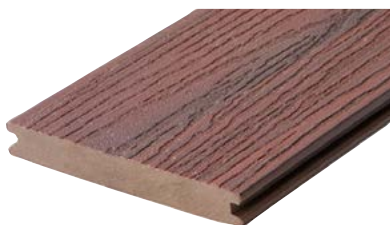

Spend more time outdoors.

Introducing the latest in wood plastic composite innovation from Eva-Last, the Eva-tech Infinity™ range. Through several years of product design, chemistry development and extensive testing, Eva-Last has developed Dura-tech™, a revolutionary decking surface material. Dura-tech™ will outperform traditional timbers and all other composites as a decking surface. The advanced Dura-tech™ layer is bonded to an Eva-tech core, the combination of these two leading materials is called the Eva-tech Infinity™ decking profile, a truly cutting-edge South African product, from a proudly South African company.

The Dura-tech™ cap technology ensures that Infinity™ will not fade or stain, rot, splinter or warp, is completely moisture resistant and is guaranteed to outperform any composite product available today. The unique manufacturing process used achieves an infinitely variable, authentic colour finish comparable only to natural wood. The Eva-tech Infinity range sets a new standard for the composite industry across the globe for all decking applications.

## **Eva-tech** **Infinity**

Madagascan Rosewood

Zambezi Kiaat

Brazilian Walnut

Silver Maple

The Eva-tech Infinity™ colour range is inspired by the exotic hardwoods from around the world. Madagascan rose wood, Zambezi kiaat, Brazilian walnut and Silver Maple woods. Welcome to the future of composite decking.

# Treasure a greener tomorrow

## Eva-tech and the Environment

Eva-tech prides itself as a recognised, environmentally friendly product, composed of recycled plastic and reclaimed wood fibres to create a sustainable outdoor treasure.

- Rest assured that the world's forests remain unscathed as no trees are cut down for the purpose of producing our products.
- Wood plastic composite technology does not require the toxic chemicals and preservatives normally used for the treatment of natural timber.
- We do our bit in contributing towards a greener tomorrow – Eva-tech will keep over 10 000 000 kilograms of plastic and wood scrap out of the earth's landfills every year.
- Not only does the use of recycled materials lower the overall lifecycle cost of Eva-tech, but it reduces harmful greenhouse gases, waste from numerous industries and most importantly conserves our precious resources for the future.

Leave your mark. Choose Eva-tech for a greener footprint.
