Designed for life.

EVA-LAST
The Superior Exterior

STEP UP TO THE STRONGEST DECKING PRODUCT LINE-UP AVAILABLE TODAY

IF YOU ONLY HAVE TIME TO READ ONE PAGE IN THIS BINDER, THIS ONE SUMS IT ALL UP....

CHOOSE EVA-LAST BECAUSE OF IT'S

Strength. Performance. Aesthetics.

Tougher plastic, to withstand more use and abuse
Resistance to staining, fading, mould & mildew
Rich colours that last, realistic wood finish, hidden fasteners.

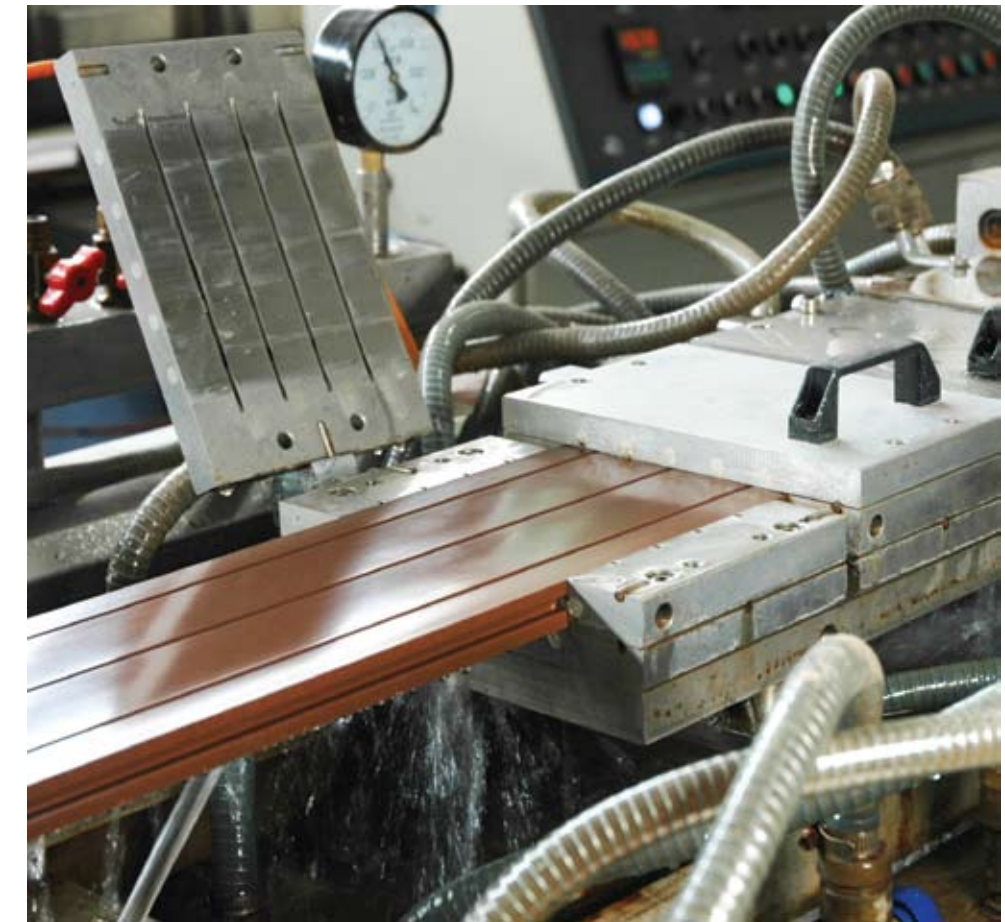

It's Pretty, Tough Stuff.

TAKING THE ROAD LESS TRAVELLED

Eva-Last had a mission – To boast superior technical knowledge and know how on WPC materials, on all of its product offering, most importantly, the behaviour of the materials in the harsh African Climate. Eva-Last thus began working with the materials first hand, gaining experience in all types of installations and applications of the products.

Through this vast experience over the last four years Eva-Last now have absolute confidence and sheer certainty on the performance of its entire product offering, and therefore you as our client can be assured of a material that behaves the way you want it to.

IN-PROCESS QUALITY MONITORING
"STATISTICAL PROCESS CONTROL"

In-line vision system continuously monitors each board width, colour trends and composition.

Quality ensured in testing stations by inspection teams during all stages of manufacture.

SPC charts maintained on all extrusion lines.

Flexure and rupture modules on every unit sold.

EVA-TECH COMPOSITE DECKING SYSTEM

A maintenance free decking solution, available in a selection of colours and finishes, quick and easy to install.

EVA-TECH COMPOSITE BALUSTRADE SYSTEM

Choose from an array of colours, designs, and dimensions. Routed top and bottom rails allow for rapid and simple installation.

EVA-TECH OUTDOOR COLLECTION

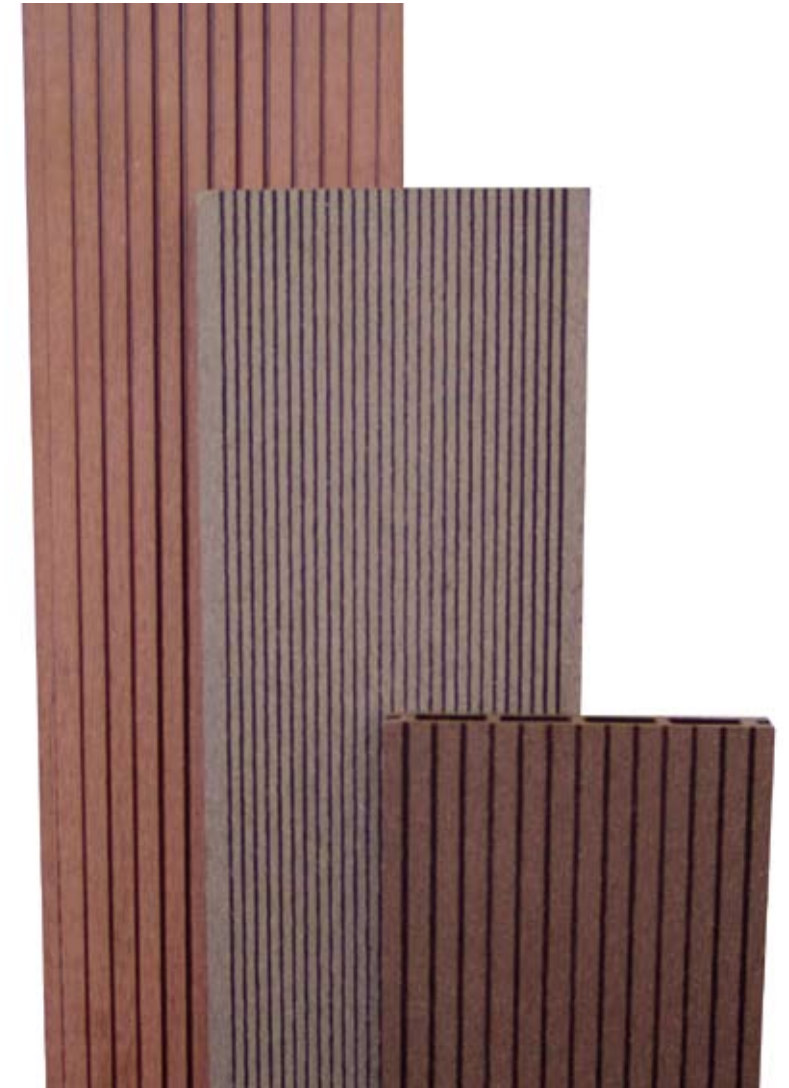

From practical use to designer finishes, a large range of useful and beautiful maintenance free outdoor furniture.

EVA-TECH COMPOSITE TILE SYSTEM

So simple to install, anyone can do it. Available in many different styles and colour mixes, ensuring you find what you are looking for.

HIDDEN FASTENING SYSTEM

Engineered to fit our channelled Decking system, holding it down tight for years to come.

WOOD

IT'S NICE, BUT IT HAS MANY DRAWBACKS:

- Cracks, checks & splinters
- Irregular colour-fade
- Very high maintenance
- Can rot, mould & mildew
- Has a predetermined shelf life

TROPICAL HARDWOOD

IT'S EXPENSIVE TO START, & THEREAFTER TAKES A LOT OF MAINTENANCE TO KEEP IT LOOKING GOOD.

Tropical Hardwoods start losing their good looks from day one, their dark colours fading as the sun dries the planks of their natural oils. It takes almost monthly maintenance to replace the oils and colour.

Eva-Tech decking boards have UV stabilisers within the composition, ensuring they will never lose their inherent colour, all of this with no maintenance.

The decking boards are made from a combination of reclaimed hardwood fibre and plastics that are extremely environmentally friendly.

COMPOSITE DECKING

AN ENTIRELY NEW PROCESS FOR DECKING

- No coating whatsoever
- Built-in toughness, for resistance to abrasion.
- No maintenance
- No cracking, splintering or warping

Made from high density Polyethylene (an extremely durable plastic) and from hardwood fibre to form the ultimate composite material.

Resists scratching and marring so common with ordinary composites. Our 10 year limited warranty gives you extra protection and peace of mind.

You'll find antimicrobial protection in all sorts of everyday products – from bedding and apparel, to kitchen and playroom equipment, to paint and hand lotion.

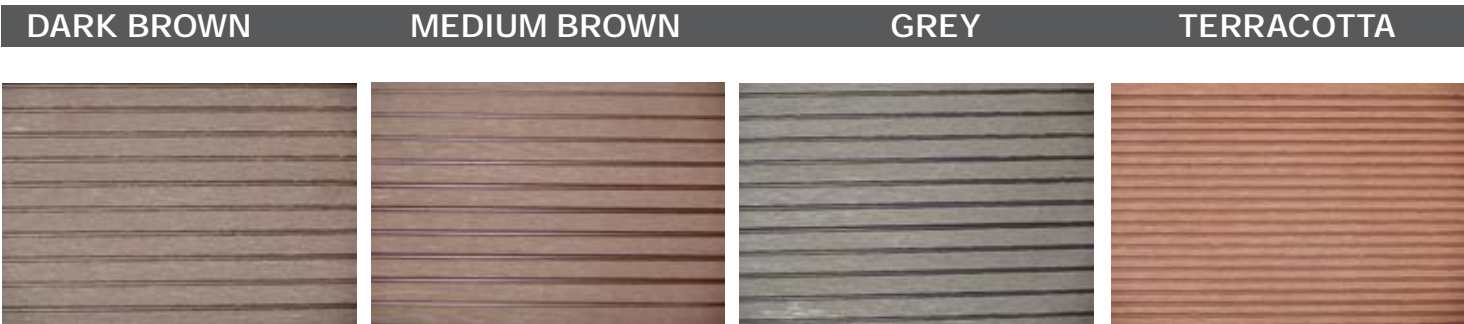

This is the first time it is being used in a decking material.

COMPLEMENT YOUR HOME WITH YOUR CHOICE OF FOUR UNIQUE AND FADE RESISTANT COLOURS:

As with any product that is exposed to outdoor environments, Eva-Tech Decking will lose some of its colour but will uphold its matte finish and never lose its inherent colour. Minor blemishes or scuffs

that may be found on the surface of a board at time of installation will blend in naturally during this process.

COLOUR FADING

We have concentrated UV inhibitors throughout the entire composition for maximum colour retention.

As with any product that is exposed to outdoor environments, Eva-Tech will lose some of its colour over time but will warm to a beautiful matte finish, never losing its inherent colour.

WEATHER & WEARING

Our rich embossed finish resists wear. You've got traction, even in the rain. And in fact has the highest slip resistance rating in both wet and dry conditions.

ABOVE:

WPC boards after being exposed to the elements for three months at the Eva-Last Testing Facility, as the picture shows the Eva-Tech Board (middle) has held its colour extremely well, whilst competitors boards look very old and colourless.

ON THE RIGHT:

A competitors board is completely oxidised and has thus started to crumble after only 3 months of exposure to the elements, this is caused by a lack of anti oxidants in the composition of the board and is a common problem with manufacturers who take shortcuts in the production of WPC materials, Eva-Tech however, is guaranteed against such material behaviour.

- CONNECTORS, BRACKETS & ACCESSORIES**

	POST	RAIL	BALUSTER
Thickness	120mmx120mm	45mmx90mm	50mmx50mm
Length	1100mm	1500mm	800mm

Table represents Eva-Tech Balustrade system dimensions. Visit our website www.eva-last.co.za for different design options and installation instructions.

Note: These conditions are considered to be normal maintenance and are therefore not covered by our 10 year limited warranty.

CONDITION	EVA-TECH 25MM AND 31MM BOARDS
General Cleaning	Dry Sweep (weekly), Pressure wash up to 1200 PSI (with fan tip)
Mould & Mildew Inhibitor	Eva-Last Deck Defender (available at Eva-Last Distributors)
Grease & Stains	Any household stain or grease remover, if stain persists a light sanding will remove completely.
Rust Stains	Warm, soapy water & sponge (with a laundry detergent)
Construction Marks	Rubbing Alcohol
Minor Scratches	Scratches will weather to deck colour
Deep Gouges or Cuts	Deep gouges or cuts will weather to deck colour, if extreme a coarse piece of sand paper must be used or decking board should be replaced
Minor Scuff Marks	Minor scuff marks will weather to deck colour
Weathering	Eva-Tech boards will weather to a lighter shade during the first 12 weeks of exposure, but will never lose its inherent colour.
Bird Droppings	Wash with warm soapy water and sponge, pressure wash up to 1200PSI (with fan tip)
Snow Removal	Only use a plastic edged shovel.
Ice Removal	Use snow/ ice melt, DO NOT chip

PRODUCT	PROFILE	DIMENSION	LENGTH	COLOURS
Decking				
	25mm	150mm x 25mm	2900mm	Dark Brown, Medium Brown, Grey, Terracotta
	31mm	146mm x 31mm	2900mm	Dark Brown, Medium Brown
Balustrade				
	Post	120mm x 120mm	1100mm	Dark Brown, Medium Brown, Grey, Terracotta
	Rail	45mm x 90mm	1500mm	Dark Brown, Medium Brown, Grey, Terracotta
	Baluster	50mm x 50mm	800mm	Dark Brown, Medium Brown, Grey, Terracotta
Fascia				
	12mm	150mm x 12mm	2900mm	Dark Brown, Medium Brown, Grey, Terracotta
	18mm	150mm x 18mm	2900mm	Dark Brown, Medium Brown, Grey, Terracotta

THIS SYSTEM SAVES YOU LABOUR TIME, PRE-SPACES THE DECK BOARDS AT A PERFECT DISTANCE, AND LEAVES THE SURFACE FREE ON UNSIGHTLY SCREW HOLES.

- One Screw per joist
- No pre-drilling
- No screw holes, except at perimeter
- Perfectly fits the groove designed into our channelled boards
- Installs from the top, not from underneath.

The LionClaw is available with a stainless steel, galvanized or nickel plated screw of the highest quality.

Each Eva-Tech board is grooved on both sides to accommodate our LionClaw hidden fastening system. LionClaws are available pre-loaded with a stainless steel, galvanized or nickel plated screw to facilitate for quick and easy installation.

- Provides a wood like finish with a much tougher surface than any wood and most wood composites.
- Machines just like timber.
- Stronger, stiffer and lighter.
- Installs quickly and is free of screw holes.
- Free to expand and contract without tugging and pulling on hundreds of fasteners.
