SIMPLE STEPS TO YOUR PERFECT KITCHEN

From ultra - modern to traditional style, we think that completing your perfect kitchen should be as easy as possible, so this brochure is designed to offer you all the information and inspiration you need to make a selection that complements the way you see your kitchen.

Your handy checklist to choosing your perfect Franke products:

Choosing a sink

Measure the cabinet width of your kitchen

- Choose the material of the sink
- Choose bowl configuration of sink
 - » If choosing an inset sink, check on the sink profile options
 - » If choosing an undermount sink, decide how you want the worksurface cutting to suit

Adding accessories and extras

- Choose from a range of complementary accessories
- Check which plumbing kit you need to buy to connect the sink to your waste system

Choosing a tap

- Choose from the full range of taps, including instantly filtered, boiling, chilled and sparkling water.

Check with your retailer/installer that your water pressure requirements will work with your chosen tap.

MAKE IT WONDERFUL WITH THE FRANKE SPECIALIST RANGE

It's easy to be ordinary; to have an ordinary home, filled with things you neither love nor hate. But you should never settle for ordinary and that's why we want to make everything we make wonderful. Wonderful turns a house into a home and turns work into play. Every Franke product aims to be wonderful in every way; from the first glimpse of carefully considered design, to manufacturing standards that ensures you can feel the quality and craftsmanship of every piece.

This brochure captures the spirit of wonderful in order to captivate and inspire you. A comprehensive range of sinks, taps and accessories can help you turn an everyday kitchen extraordinary and turn a daily chore into a guilty pleasure.

Let everyone else be ordinary. Let's make it wonderful.

Be inspired

We are constantly thinking of new ways to make our range even better, adding new products, new ideas and new innovations.

CHOOSING YOUR PERFECT SINK

As the kitchen sink is seen as the heart of the kitchen, it's the perfect starting point for creating your dream kitchen. Let your imagination run free with a range of fabulous options to help you maximise space and accentuate the look of the entire room. There are however certain functional considerations to take into account and the following information will help to ensure that your ideal sink is the perfect fit for your ideal kitchen.

Installation type

Inset

Inset sinks are installed from above into a pre-prepared hole in your worktop. It gives you the widest range of sink shapes, sizes and styles to choose from.

Slimtop

Flushmount is similar to an inset installation where the sink sits very slightly raised above the worktop.

Flushmount

Flushmount is similar to an inset installation where the sink sits flush with the worktop. A CNC machine is used to prepare the worktop.

Undermount

Undermount sinks are installed underneath the worksurface and therefore require a solid surface worktop such as granite, stone or treated wood. They are not compatible with laminate worksurfaces.

Plumbing Kits

Franke plumbing kits are designed to assist in optimising the underside of the cabinet space and in many cases provide for better utilisation of under-sink storage.

Franke Spazi plumbing kits are made from rigid grey polypropylene and are the hygienic solution to a Franke sink waste system. Spazi plumbing kits have a manifold with an incline and an air vent for faster water disposal. The relevant plumbing kit is shown with each sink throughout this brochure.

Sink accessories

It's the little things that make life extra special, so we've developed a range of extras to do just that. People use their sink in different ways, so these products correspond to common kitchen activities, complement the design of your Franke sink and turn it into the ultimate multi-purpose workstation.

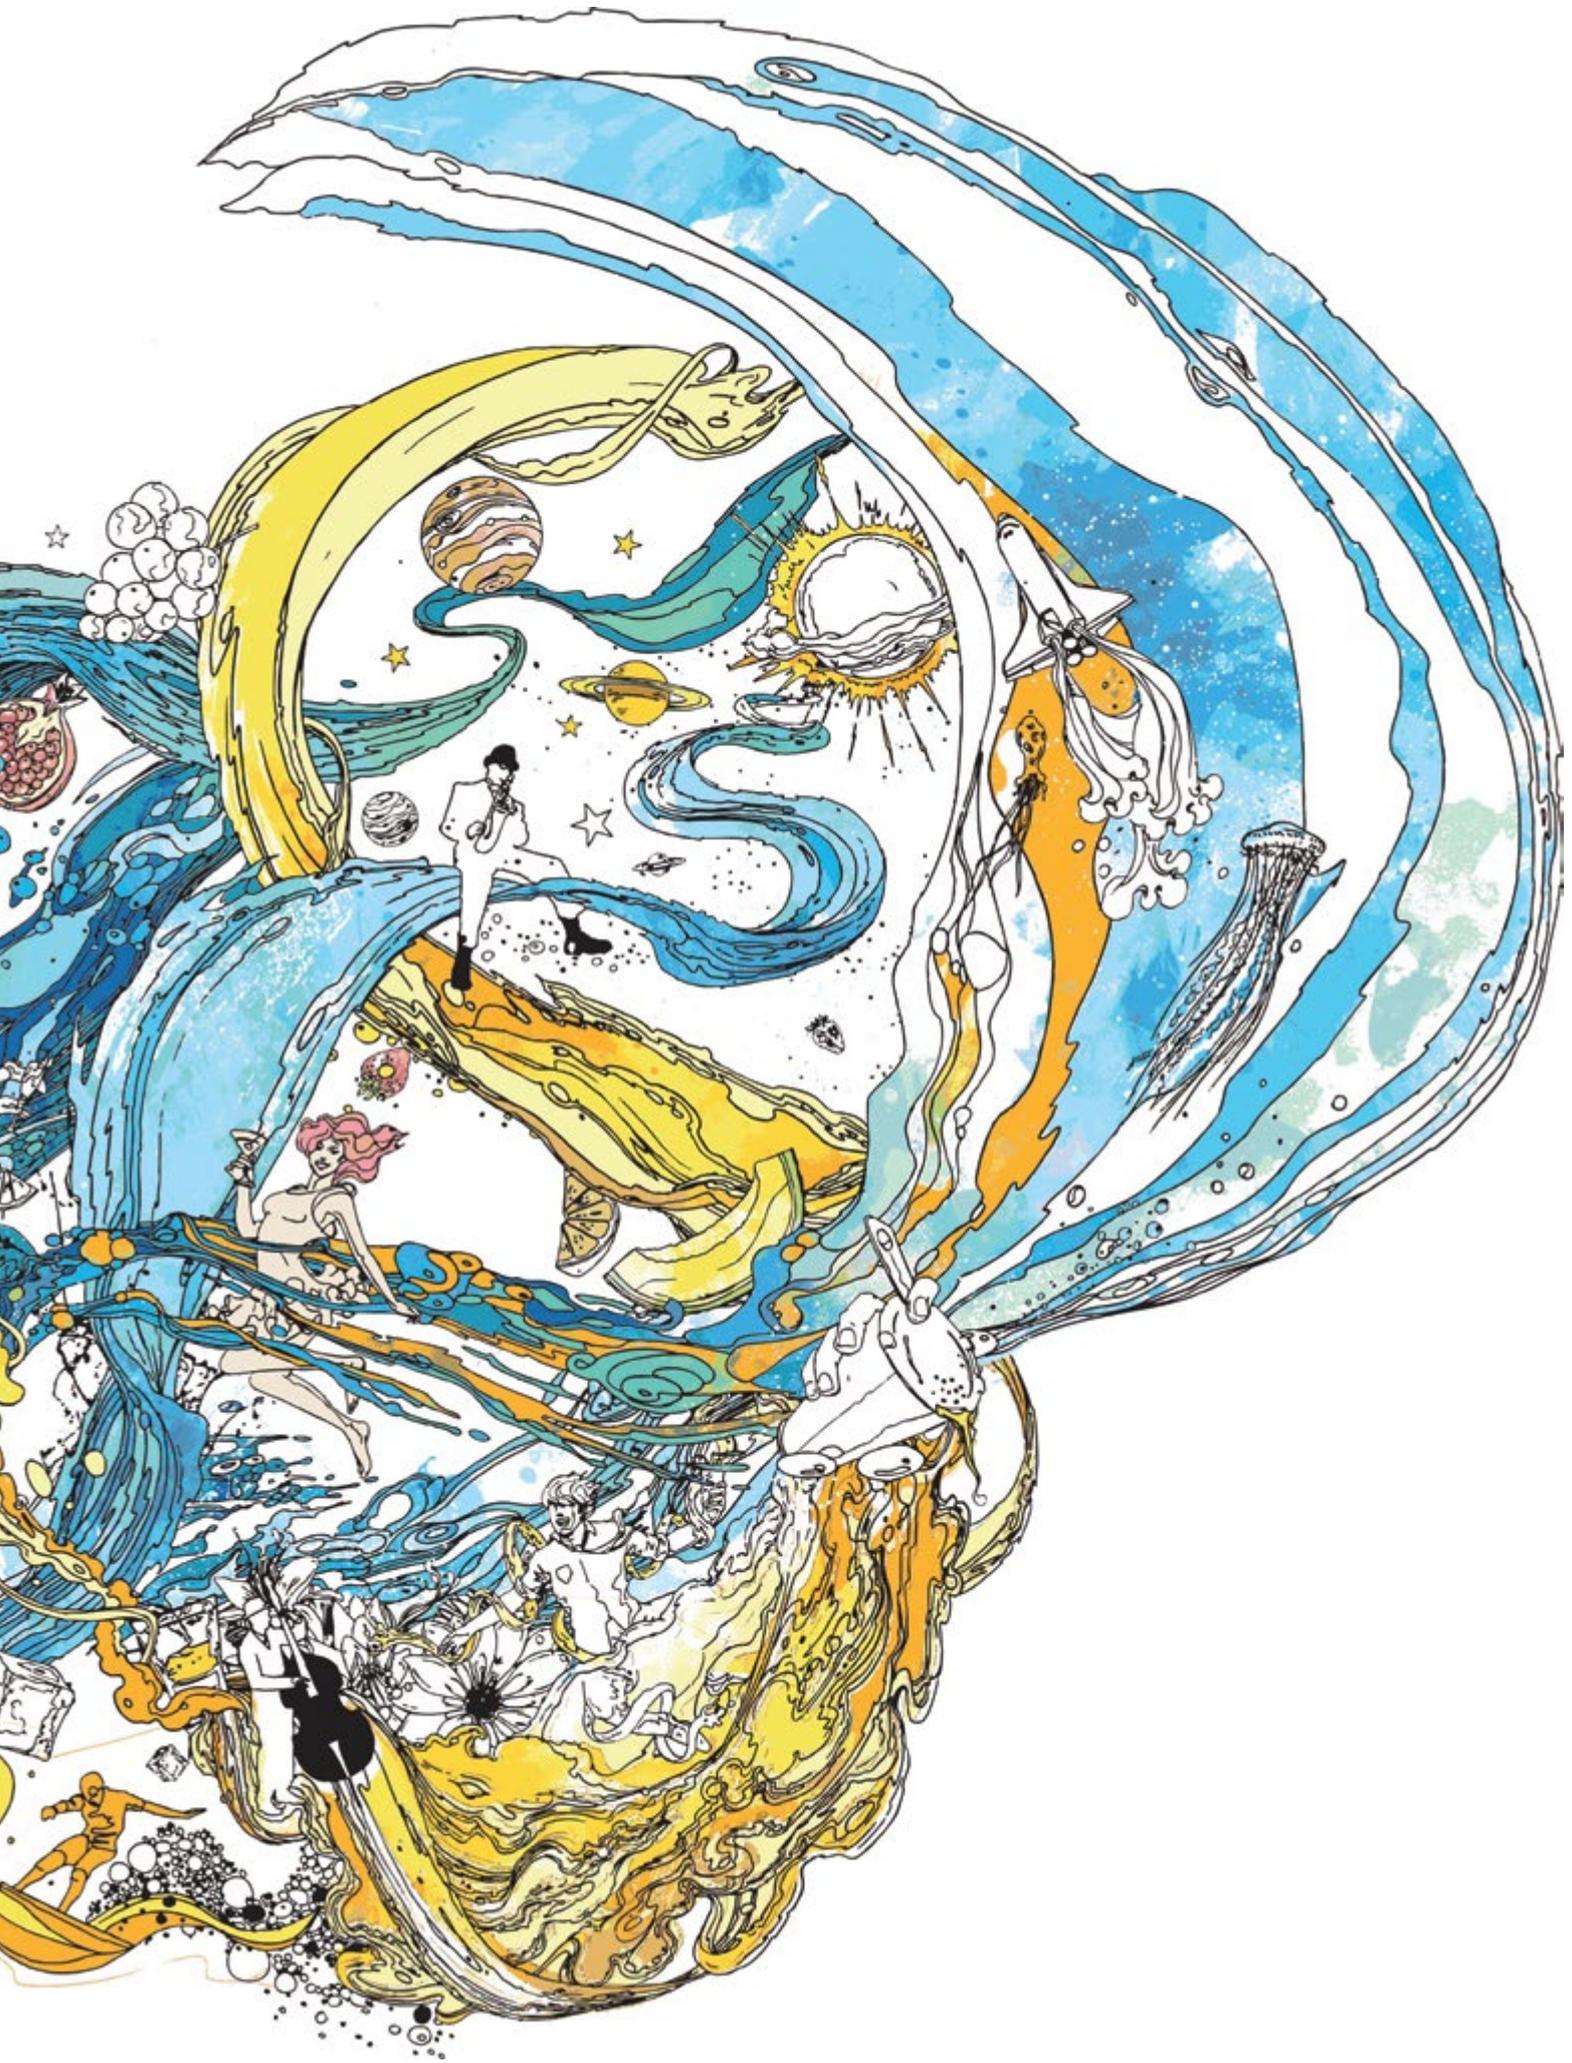

Tap Brace 1330007
Optional extra to be used to reinforce heavy duty and/or taller taps.

Inox Cream 1120047
250g Tube
Cleans, Shines, Polishes And
Revitalises Stainless Steel.

Material and Finish Options

Everyone has a different vision of what would make their kitchen wonderful, and that often begins with how they intend to use it. The demands on your sink will dictate which material is right for your kitchen, as each precision-engineered material has individual character and unique benefits. Our range covers everything from the latest trends to traditional favourites, so all you have to do is pick the one that best fits with your cooking style, your lifestyle and your personal style.

Fragranite

Following extensive testing and development, new Fragranite tackles the humble cleaning problem associated with composite sinks. The revolutionary new Fragranite + technology is now available on all Franke Fragranite and Silksheen Fragranite sinks, which now enjoy ultra-smooth surfaces that are exceptionally easy to clean.

Germ resistant

Fragranite treated with Sanitized® reduces bacteria and microbe growth by 99% giving the sink lasting protection.

Scratch resistant

Knives and forks won't scratch the surface.

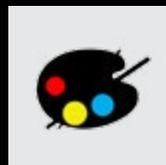

Impact resistant

Fragranite is resistant to impact and thermal shock.

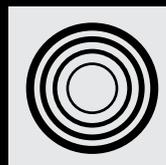

Stain resistant

The surface colour will not stain or mark and thanks to the silky smooth SilkSheen it is very easy to clean.

Colour resistant

The surface colour will not fade throughout the lifetime of the product.

Heat resistant

Fragranite surfaces will not be affected by heat up to 280°C.

Fragranite treated with Sanitized®

Fragranite is an exceptionally tough material which is highly resistant to burns, dents, chips and stains. It was pioneered by Franke and contains 80% granite to form a unique material with a subtle sheen that is warm to the touch.

Kitchens can be a critical location for spreading bacteria and demand special attention to hygiene. On unprotected material, bacteria can multiply every 20 minutes making surfaces unhygienic. The intergrated Sanitized® hygiene function in Fragranite sinks helps to keep this area clean and provides the sink with lasting protection. It does not replace normal cleaning but helps to keep surfaces free from bacteria. Tests have proven that Fragranite treated with Sanitized® reduces bacteria and microbe growth by 99%.

Advanced Power-Pulse™ technology control power phasing precisely to cut energy consumption.

Enjoy more precise temperature control - Power-Pulse™ also regulates boiling water temperature, maintaining the set temperature within 0.2°C.

Zip HydroTap automatically calculates boiling point and sets its controls accordingly. (Compact2 adjusted manually).

Automatically sleeps when unused. After two hours of non-use, Zip HydroTap G4 either powers down to maintain boiling water at 64°C or hibernates.

Free Flow™ bottle-filling feature allows you to fill bottle after bottle with filtered cold water even when the rated chilled water capacity is exceeded.

Every drop of water is dispensed at the set temperature so there is no water wasted running a tap until the temperature is right.

An air-cooled system never dumps water into the drain, as water-cooled systems do, making HydroTaps more environmentally responsible.
