# EXOS.
# Opening Up New Horizons

EXOS. the new Franke system line,
opens up new horizons with its accessories
for public and semi-public areas.
One line. One system.
One consistent design language and clear-
cut shapes.

EXOS. accessories by Franke – functionality and
performance. Interchangeable fronts made of high quality
materials, such as stainless steel and glass, are beautifully
designed and can be incorporated individually in any
architectural setting. Clear-cut lines. Sophisticated shapes.
The timeless design makes for harmonious proportions.

EXOS. accessories by Franke.
Features and design in harmony.

## EXOS. MATERIAL

Franke's modular EXOS. system with its range of
high quality materials is perfect for any situation.
Customised. Modular. In existing or new architectural
settings.

EXOS. and its materials.
Sophisticated, high quality, robust, modern, easy to
clean and hygienic.
Everything well thought out. In one design line.

### Stainless steel
The use of stainless steel as a basic material for equipment
in public and semi-public washrooms is standard, for good
reason. This well established material combines a stylish
appearance with functionality and durability.
It can be perfectly combined and can be harmoniously
supplemented with materials such as glass and ceramics.
Because of its material properties, stainless steel can take
on and reflect the colours of its environment. Stainless
steel products can easily be integrated into almost any
room.This material sets standards.

### Stainless steel with InoxPlus refinement
With Franke's InoxPlus surface coating the already easy to
clean stainless steel has been approved once more. And
so, annoying finger prints which previously often adhered
stubbornly to stainless steel now belong practically in the
past.

This is a technology where nano particles interlock with
the molecules on the metal surface and thus nestle closely
against microscopic imperfections. The results are deep
finished, easy to clean, fingerprint-resistant surfaces.

### Toughened safety glass
Single glazed toughened safety glass is a material which,
like stainless steel, is distinguished by its timeless character
and its ability to be combined with other materials. Glass
and stainless steel represent high quality and timeless
elegance. You can no longer imagine modern room design
without these two materials. Therefore, the deliberate
combination of the two materials is particularly attractive.

In accordance with safety requirements in washrooms
Franke only uses toughened safety glass.

# WASHROOM ACCESSORIES

The use of Stainless Steel as the material of first choice for products in public and semi-public washrooms has become today's standard for good reasons. This material is robust and, easy to maintain, and therefore is very durable which makes the products economical over the lifetime of the building. Sanitary fixtures that inhibit vandalism and are easy to clean help building operators to keep service and maintenance costs to a minimum.

Practical experience shows that using high-quality materials reduces the staining of products  that helps to maintain the appearance of heavily used washrooms. Wash stations and accessories take on a hygienic atmosphere. Thanks to its durable and hygienic characteristics, Stainless Steel provides clean and safe products for public washrooms.

# Stratos

## Stratos - Smart Hygiene Solutions

The Stratos Designer Range has a unique arched design which compliments any washroom, giving the space a coordinated and elegant appearance.

## Features

- Designed for heavy duty applications
- Manufactured from Grade 304 Stainless Steel
- Hygienic & vandal resistant

- Easy to clean - the STRATOS range of accessories is surface treated with InoxPlus Technology - which visibly reduces fingerprints

## What is InoxPlus Technology:

Franke has created the first stainless-steel surface treatment to use nanotechnology to provide a guaranteed long-lasting, clean finish and appearance.

## Properties:

- reduced visibility of fingerprints
- easy to clean
- temperature-resistant 25°C to +80°C
- strong adhesion to the surface
- high abrasion resistance
- resistant against most cleaners
- resistant against acids and alkaline fluids used in household cleaners

# Self-Closing Taps

Complementing the Franke range of accessories is a range of basin taps and mixers, designed to improve hygiene and decrease water consumption in public ablutions. The range of electronic sensor taps and self closing taps are available in a choice of designs with or without a user operated temperature mixer. When operated, the water flows for a set period, which is adjustable by the installer and then closes automatically. With good aesthetic design and very reliable technology the products meet the high demands placed on modern sanitary fittings. The taps are suitable for a wide range of applications in public, commercial washroom and sanitary installations.
