# FRANKE KITCHEN SYSTEMS IN SOUTH AFRICA

Franke Kitchen Systems South Africa is an established business, owned by the number one sink manufacturer and market leader in the world, Franke AG, Switzerland.

The Franke Group worldwide supplies some 6 million sinks annually from plants situated in sixteen countries.

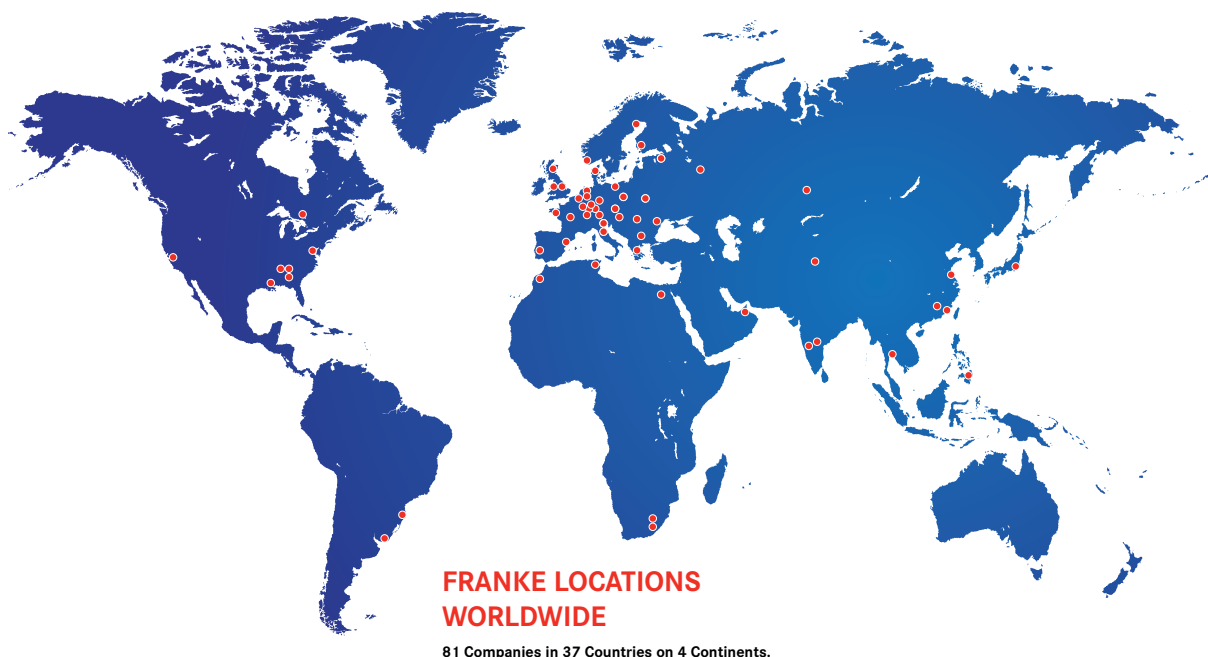

Franke Kitchen Systems South Africa has its manufacturing plant and head office based in Durban, South Africa, using state-of-the-art equipment with world class manufacturing practices, whilst continually investing in its technology and people skills.

90% of Franke South Africa's own manufactured products are sold into South and Sub Saharan Africa. Exports is a key focus of our local manufacturing strategy and stretch as far afield as Australasia, Brazil, Mauritius, Ghana, and Nigeria.

Franke South Africa supports local producers of its supply and service requirements, including raw materials, packaging and fittings with its key objective to aid local job creation, skills transfer and sustainability.

Franke Kitchen Systems South Africa is ISO 9001:2008 quality management certified and has a BBBEE status rating level of 5, with a future road-map to improve its rating.

In 2014 Franke Kitchen Systems South Africa will be celebrating it's 100 year centenary.

SUGGESTED ACCESSORIES

# Cascade

The new Cascade range follows the European trend of square designs to compliment appliances and softened minimalism. Casade is manufactured in South Africa using the latest Franke Swiss technology to produce consistent high quality products. The sinks are produced using monoblock technology to minimise welding, and in doing so ensures that quality and performance is of the highest standards.

A compact sink with a 500mm width and a larger draining area has been achieved through the new positioning of the bowls. All sinks are supplied with a basket strainer waste fitting to reduce waste entering the draining system.

# CLEANING & MAINTAINENCE

**WARRANTIES:**  
- Sinks: 25 years against corrosion  
- Mixers: 5 years on body  
- Cartridges for mixers: 2 year

## CLEANING PROCEDURE

Clean the Stainless Steel as often as experience dictates (i.e. when noticeably dull or dirty) and use the simplest cleaning procedure that will effectively “do the job”.

- Stainless Steel reacts best to clean water or mild detergent solution, applied with a soft cloth or sponge, rinsed well and wiped dry.
- Routine, simple, gentle and inexpensive cleaning will retain both the corrosion resistance and appearance of Stainless Steel through years of exposure and use. Occasionally a small amount of Inox Creme may be used on a soft, damp cloth with the detergent solution to remove stubborn dirt or slight incipient stains. Rub gently.

## CLEANING DO'S

- Employ regular routine cleaning rather than an occasional aggressive single cleaning.
- Only use propriety brands of cleaners that state “SUITABLE FOR STAINLESS STEEL”, such as Inox Creme
- Always rinse and dry as the final step in a cleaning procedure.

## CLEANING DON'TS

- Do not use coarse abrasive powders.
- Do not use metallic scourers or brushes with metal bristles.
- Do not use the so termed “silver cleaners”.
- Do not use acids (except nitric acid in specific instances).

## STORAGE OF PRODUCTS

Product research has proven that certain household products which may be stored underneath a sink, can lead to damage of the sink's base. Chlorine is the major culprit and can be found in: chlorine for swimming pools; household bleach; bathroom cleaning products such as toilet cleaners, mildew treatments and tile cleaners; kitchen cleaning products - especially liquid cleaners; powders for dishwashers and laundry detergents. Preserve the life and beauty of your sink by storing these products away from the sink area in a well ventilated cupboard that is preferably child-proof.

## INOX CREME

Product Code: 303207

- cleans, shines, polishes and revitalises Stainless Steel
