
LAUNDRY PRODUCTS

Laundries are subject to heavy usage and a comprehensive range of products are available to meet the criteria of aesthetics, functionality and application.

The range of products cover various sectors of the industry varying from residential to industrial and public facilities.

Most laundry products are externally used and exposed to the elements and sunlight. Stainless Steel is highly resistant to deterioration in these applications.

Various Designs for Different Applications

- Suitable for a variety of environments
- Selection of washtroughs and laundry products
