COTTAGE STONE®

COTTAGE STONE®

The photographs in this brochure do not necessarily reflect actual product colours.

Its elegant charm, smooth finish and appealing colours have made the Cottage Stone® paver a favourite in applications as varied as home gardens, shopping malls, office parking, patios and swimming pool areas and retirement home projects.

The Cottage Stone® is a uniform paver. This unique paver features a non bevel edge on one face making it ideal for use in areas where trolley and heel friendly surfaces are required and the other face has a small bevelled edge allowing you an option of finish.

Cottage Stone® is highly cost-effective with only 33 blocks required for each m² of paving and is offered in a range of body-through colours.

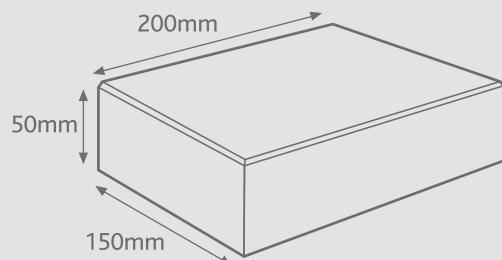

The use of the paver is, however, not restricted to conventional pavements. It can be used for constructing flower boxes, stairs, benches, municipal pavements, walkways, traffic islands and parking areas. It can also be employed to create a wide variety of contrasting effects when used in conjunction with INFRASET's wide range of paving products.

COVERAGE

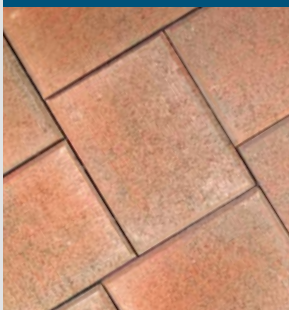

Approximately 33 blocks per m².

ESTIMATING

Allowance must be made for laying tolerance and edge cutting.

Laid bevel face up

Laid bevel face down
