

SPECIFICATION SHEET NO: RD468t

NEW WORK/REPAINT: REPAINT - EXTERIOR - WATERPROOFING - using a membrane

SUBSTRATE: Cement Plaster / Concrete / Fibre-Cement

Parapet walls, flashings, etc.

PAINT FINISH: Plascon Gelseal PRODUCT CODE: WGS

(An acrylic sealer used in conjunction with a polyester

membrane for maximum waterproofing)

COLOUR: Black WGS1, Grey WGS2, Red, WGS 3, White WGS 4, Green WGS5.

ENVIRONMENT: The Maintenance Cycle is a guide but can vary due to micro-climate changes identified on

the site which will affect the longevity of the coating system

As per ISO 12944: Maintena4ce Cycle (Years)

SPECIFICATION SHEET NO: RD468r

SURFACE PREPARATION:

^ After a full site assessment has been conducted, select the appropriate surface preparation required from Surface Preparation clauses for remedial procedure.

APPLICATION:

Primer Coat

Spot prime bare and repaired areas with Professional Gypsum and Plaster Primer (PP 700). Allow 16 hours to dry.
Finishing Coats

- Apply a heavy wet coat of Plascon Gelseal (WGS) at a spreading rate of approximately 1.4 m²/8. Immediately embed Plascon Roofseal Membrane (WRM) into the wet paint with a fluted steel or plastic roller. Allow 2 hours to dry.
- Apply a sealer coat of Plascon Gelseal (WGS) at 1.4 m²/£ to seal the membrane completely. Allow 2 hours to dry.
- ^ Apply a final coat of Plascon Gelseal (WGS) at 1.4 m²/ℓ for durability.

TABLE REFERENCES:

Revision Date: January 2016

- ^ Technical Data Sheet (TDS): User must always ensure that latest issue is used.
- A B = Brush (ready for use), R = Roller (synthetic, min. 10mm pile) (ready for use), S = Airless spray (ready for use).
- ^ Theoretical spreading rate quoted is for smooth non-porous substrates and does not include allowance for surface profile, porosity, wastage and uneven film application. Suitable allowance should be made according to type of work, method and skill of applicator. Practical spreading rate quoted is an average guide only actual must be determined by user.
- ^ Overcoating times are at 23 °C and 75 % relative humidity. Longer times must be allowed under cooler and moist conditions. DO NOT paint during inclement weather and when temperature is below 10 °C.
- ^ Fading and chalking will occur to a greater or lesser degree depending on pigmentation and generic binder type.
- ^ NB: Life expectancy may vary, depending on environmental conditions and stresses, within the macro/micro climate of the project.
