

PEDESTRA™

Safety Vinyl Flooring

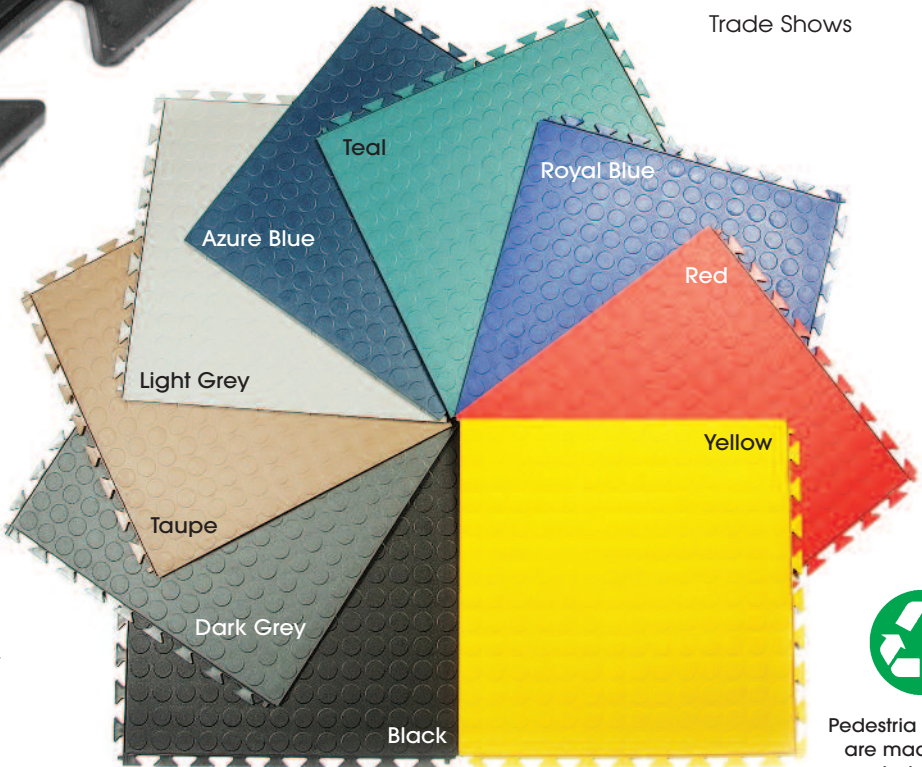

Pedestra was the first "Tuff Seal" design incorporating a patented hidden interlock and sealing system. This tile is designed for interior use and can be installed over virtually any hard surface. The sealing cavity on this design is found on the bottom lip of the tile joint.

The popular studded pattern is available in a range of colours while the attractive checkerplate pattern is available in both black and dark grey.

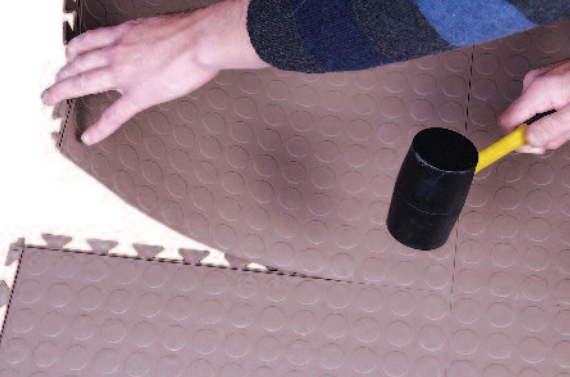

Although adhesives are not necessary in many light duty applications, it is recommended that the tiles are glued to the subfloor. In dirty or high traffic environments it is recommended that the special interlock glue is used, in addition to the full spread adhesive.

Applications

- Sports and Gym Flooring
- On top of access floors
- Retail Showrooms
- Home Garages
- Control Rooms
- Trade Shows

Pedestria products are made from recycled vinyl and are 100% recyclable.
