

SPECIFICATION

The Crealco NewYork Balustrade was developed as a balustrade for balconies and other related areas. It is available in four different configurations and can be designed with a gate option, as well.

The system has passed the SANS 10400 and if manufactured according to prescribed Wispeco Aluminium specifications, the window will comply with National Building Regulations.

Before Impact

During Impact

After Impact

For further information and assistance regarding our product U-values and SHGC-values, the Crealco U-Solve calculator can be downloaded from www.u-solve.co.za. U-Solve allows the user to design any window configurations within the specified parameters.

To ensure for the appropriate care and preservation of the Crealco products, please refer to the Wispeco Installation, Cleaning and Maintenance Procedures Manual.
