

AP3 Unika

The access control system combining
the electronic flexibility in the
mechanical key arrangements.

AP3 Unika

Ideally suitable for small - to medium - sized commercial premises

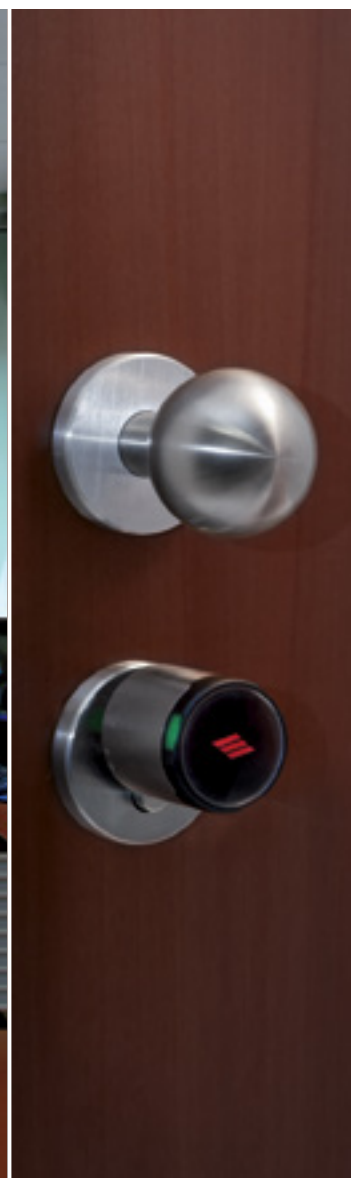

As it allows for rational organization of access

Thanks to its master key systems, CISA is able to offer customized solutions: you can decide which keys will open each door.

As keys are protected

AP3 mechanical keys are patented. No-one may obtain any AP3 key duplicates without been identified as the owner.

As it offers the flexibility of electronics wherever it is needed

In environments where access authorizations must be regularly updated, time slots must be arranged and a log must be recorded, an electronic access control system can be set up.

AP3 Unika

One key to open all accesses

AP3 UNIKA enables to combine AP3 master key systems with CISA WaveMode electronic cylinders.

AP3 UNIKA is the key associating the AP3 mechanical system, patented and with duplicates only obtainable from CISA and CISA Solution Partners, with a new key bow equipped with a transponder, which can open up to 16 CISA WaveMode electronic cylinders.

AP3 UNIKA associates the security and convenience of mechanical cylinders with the flexibility of electronics for all-round access management.

Checking Who-Opens-What with AuthentiCard

By logging in to our website **www.cisa.com/authenticard** you will be able to:

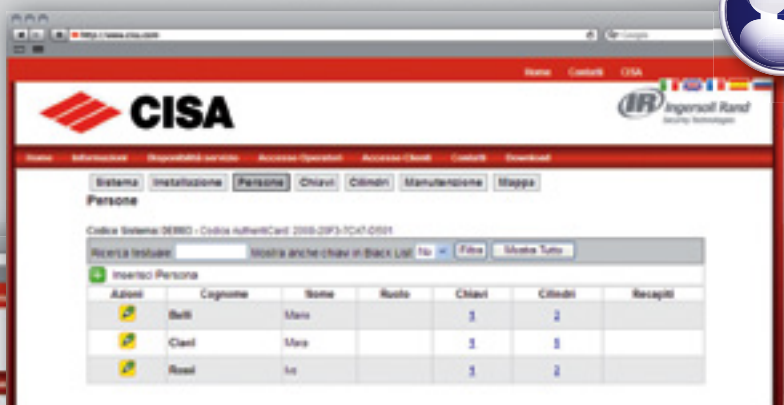

- track the users to whom keys have been assigned;
- view the authorized accesses and the corresponding time slots;
- check the key assignment log.

www.cisa.com/authenticard

WHO

OPENS

WHAT

AuthentiCard, sold together with AP3 UNIKA, identifies the owner of an AP3 UNIKA system.

AuthentiCard enables to access the website **www.cisa.com/authenticard** there you find the complete information regarding your system (users, keys and doors).

Moreover, you can request and obtain a copy of your mechanical key only by submitting AuthentiCard to a CISA Solution Partner.

Managing and deciding Who-Opens-What with AP3 Unika kit

With AP3 UNIKA kit, and being able to access the AuthentiCard website, it is possible to fully manage the system.

AP3 UNIKA combines the advantages of software management with an easy-to-use, web-based platform. It offers immediate operational design: no management software is needed; it is enough to connect to a PC the reader contained in the AP3 UNIKA kit and go to the website www.cisa.com/authenticard.

In this way, electronic card and key encoding, access log displaying and electronic cylinder maintenance can be controlled from any PC, in a completely self-sufficient manner.

System elements

AP3 UNIKA KEY

- CISA patented, reversible flat key with mobile element (PCT/EP99/07611).
- Controlled duplication possible at Cisa Solution Partners and Cisa.
- Nickel-silver key with numerical code on the key neck.
- Key bow with ISO-14443-A transponder (Mifare).
- Long neck, compatible with protective roses.

AP3 CYLINDER

- Key duplication possible at Cisa Solution Partners and Cisa.
- Snap Resistant cylinder, highly resistant against breaking and snapping.
- High resistance to "bumping" or percussion.

AUTHENTICARD

- Contactless card up to ISO-14443-8 standards.
- PIN card.

CISA WAVEMODE ELECTRONIC CYLINDER

- Cylinder dimensions compatible with European profile locks according to DIN 18254.
- No wiring required: battery powered (2 3V lithium batteries type CR-2). Durability 30,000 cycles.
- Contactless technology compatible with ISO-14443-A (Mifare) and ISO-14443-B.
- Emergency opening (in case of flat batteries) possible with external power supply (Low Power adapter).

AP3 UNIKA KIT

Contactless USB reader (for Windows PCs) up to ISO-14443-A (Mifare) and ISO-14443-B standards.
3 Operator Contactless Cards CT5 (Mifare 4K).

Available accessories:

- Flat battery replacement kit.
- User Contactless Card CT6 (Mifare 1K).
