

WE THOUGHT AHEAD...

CISA certifications since 2002.

18 February 2013 was the deadline for replacing all non-CE marked panic exit devices.

CISA was the first company in Italy to introduce this marking and CISA panic exit devices have actually been CE-certified since 2002.

...WITH A PRODUCT THAT STANDS THE TEST OF TIME

500,000 reasons to choose FAST

Today, in keeping with its policy of ongoing improvement and compliance to applicable standards, CISA has obtained further certification from ICIM, the certification body that is recognised throughout Europe.

This voluntary certification certifies the durability of FAST panic exit devices for 500,000 cycles on doors weighing 400 kg, compared to the provisions of the highest grade of the standard (Grade 7) which tests 200,000 cycles on doors weighing over 200 kg.

CISA S.p.A. reserves the right to make any changes to products illustrated in this catalogue without prior notice.

About Allegion

Allegion (NYSE: ALLE) creates peace of mind by pioneering safety and security. As a \$2 billion provider of security solutions for homes and businesses, Allegion employs more than 7,800 people and sells products in more than 120 countries across the world. Allegion comprises 23 global brands, including strategic brands CISA®, Interflex®, LCN®, Schlage® and Von Duprin®.

ALLEGION

CISA

FAST

Panic exit devices
Push forward with confidence

ALLEGION

CISA

A solution for every requirement.

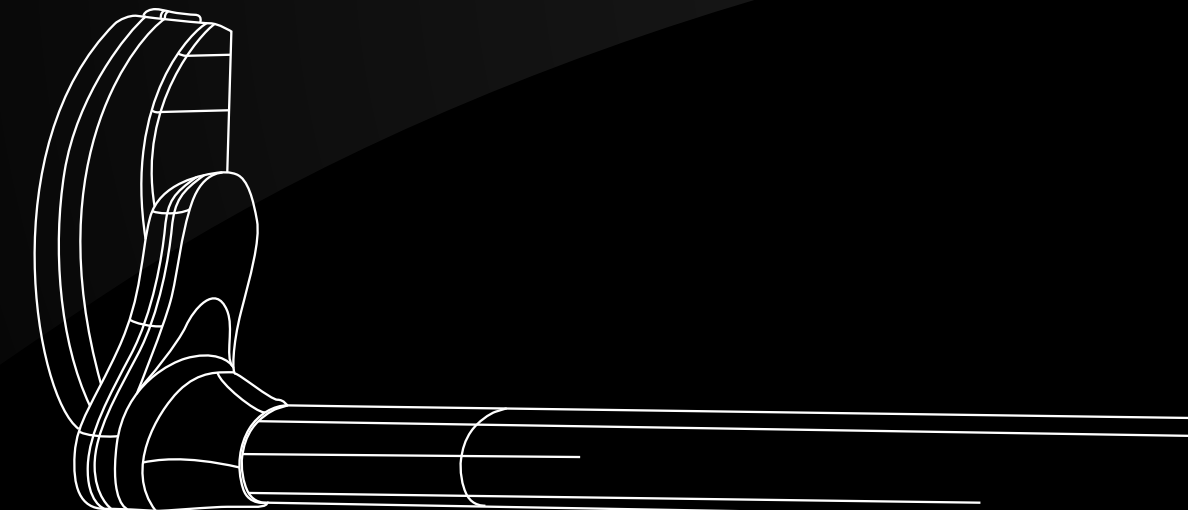

CISA panic exit devices satisfy an important requirement: they guarantee maximum security and safety in environments with heavy human traffic, like cinemas, theatres, offices, sports centres, while complying with European standards.

FAST

Easier to install and sturdier design.

Installing **CISA FAST** panic exit devices is quicker than installing earlier models by as much as **50%** (CISA test).

The bold, eye-catching design of the **CISA FAST** panic exit devices highlights the strong construction and reliability of the product.

FAST TOUCH AND FAST PUSH

Two versions: rim and mortice.

FAST BY NAME AND NATURE

Installation has never been easier - or quicker.

NEW BENEFITS IN 5 POINTS

For a perfect combination of protection and design.

FINISHES

Strength and security without compromising on style.

CISA offers two types of panic exit devices, two separate families characterised by different structures and installation requirements.

Fast Touch and Fast Push RIM VERSION.

The rim version is extremely quick fitting. CISA provides solutions for single or double leaf doors. Thanks to the wide range of accessories, any installation requirements can be met.

Fast Touch and Fast Push MORTICE VERSION.

The latest solution available for emergency exit system management. This system combines a panic exit device with a special panic function mortice type lock, with the panic exit device being the only visible element. The result is a complete, certified system combining maximum anti-burglary security with a stylish, beautifully crisp design.

Installing FAST panic exit devices can be quicker than installing earlier models by as much as 50%* thanks to recent technical improvements making it possible to:

- install additional locks on support plates with a quick-lock system and carry out adjustments on site;
- carry out easy adjustments via a flexible cable connecting the additional locks to the common entrance mechanism;
- reach the adjustment screws on the common entrance mechanism easily as they are ergonomically positioned to help the installer;
- carry out installer-friendly cover, cable and bar cutting by following simple instructions which do not require any measurements;
- install the bar in a few simple operations after fixing the mechanisms;
- quickly fix the cover with no screws needed.

* CISA Test

Easy **MAINTENANCE**. None of the covers in the range have fixing screws so can be quickly disassembled for inspection purposes and lubrication. Re-installation is just as quick and easy and no tools are needed. Extraordinary maintenance is therefore reduced.

Complete **INTERCHANGEABILITY** with the previous version. The change-over from earlier models to new versions is smooth and seamless, quick and easy, with no work needed on the door.

LOW NOISE. The cable for the additional lock connection reduces operating noise associated with traditional extended bolts.

FAMILY FEELING. The homogeneous design allows aesthetic continuity among the various types of panic exit devices so several different designs can coexist in the same environment.

Increased property **SECURITY**. When combined with SikurExit, the multipoint panic function lock for aluminium doors, and Exitlock, the panic function lock for armoured doors in buildings with heavy human traffic, CISA FAST ensures maximum protection against forced entry while still allowing quick exit from the building in case of danger.

FAST IS SO MUCH MORE THAN TECHNOLOGY.

The focus on design and colour combination makes FAST panic exit devices highly versatile products, blending in with any environment.

The CISA FAST range offers an extensive selection of finishes with the possibility of matching the colour of the device with the bar. PVD finishes in particular successfully combine stylishness and strength.
