## NightWatcher ROBOTIC SECURITY LIGHTING

The NightWatcher is a unique security light that monitors and tracks the movements of an intruder. With NightWatcher there is nowhere to hide.

210° TOTAL DETECTION RANGE

- The 3 PIR's (passive infrared sensors) are the unique element that makes this product so effective, each relaying intruder positioning to the microprocessor, which in turn rotates the light head to that exact position.
- These highly effective PIR's allow for a total detection range of 210°, covering a distance of 10 meters from the unit.
- The NightWatcher was built to withstand the elements. It's sturdy design has an IP Rating of 55, allowing it to withstand harsh weather conditions.
- The NightWatcher also comes with various modes for all day activation, day and night activation, night-only activation and protection against power failures.
- The NightWatcher is user friendly and very easy to install.
