FRANKE HOTEL AND RESIDENTIAL ACCESSORIES IN STAINLESS STEEL

Although they contribute to only a fraction of a bathroom, no bathroom is complete without accessories. Franke's assortment of 304 Stainless Steel Accessories puts the finishing touches to a perfectly matching range of designs. Each range is created with different styles in mind, making it easy for a designer to integrate these accessories with almost any kind of design concept.

STAINLESS STEEL

High-quality Material

Stainless steel is considered to be the best material in terms of hygiene and durability all over the world. It is not only resistant to moisture and most acids, it also stands out due to its hardness, durability, high tolerance of heat and cold, and hygienic characteristics. Dirt and oil can easily be washed from the smooth, pore-free surface. Scratches and grooves on covers lose their sharp edges quickly and blend into the surface.

Stainless steel contains at least 10.5% chromium (Cr) and no more than 1.2% carbon (C). They form a self-regenerating surface layer (passive layer) that gives the material its resistance to corrosion, thereby ensuring significantly improved characteristics compared to unalloyed steels. Franke uses steels with higher chromium content and nickel as an additional alloy component for its sanitary fixtures. This combination further increases resistance to corrosion.

Source: Yasar Renkci, dipl. Engineer Metallurgy TU, Franke

Characteristics of 304 Stainless Steel

- Chrome/Nickel V2A ; 18 Cr/10 Ni
- Very good level of corrosion-resistance
- Non-magnetic
- Rust free, acid resistant, hygienic and easy to clean

The Medius Design has been created with the purpose of matching classic style sanitary ware. The complete range can be installed to all classic design environments.

FIRMUS

Combining razor sharp looks while still maintaining a simplistic design that compliments a variety of ambiances. The contoured lines (no sharp edges) make it easy to clean and maintain while also projecting a sense of comfort.

Like the name suggests, Cubus design is based on square lines and solid material. This range gives a futuristic look design-wise. Most suitable for bathrooms that are designed with a subtle, yet unrestrained look.

FRANKE HOTEL PUBLIC WASHROOM SANITARY SOLUTIONS

The key to top-class washrooms in the hotel lobby and restaurants is creating an atmosphere of homeliness that welcomes the guest to a return visit. At the same time economic efficiency and ease of care are focal issues. Customised concepts for washing units, aesthetically pleasing surfaces and high-quality accessories provide optimum sanitary room facilities that leave a positive memory without neglecting cost of operation.
