TRIFLOW WATER FILTRATION SYSTEM

FRANKE

TRIFLOW - KUBUS

**ECO-
FRIENDLY**

**NO MORE
BOTTLED
WATER**

**SAVE
MONEY**

**GOOD
FOR YOUR
HEALTH**

Discover the unique advantages and health benefits of the Franke Triflow water filtration system. Designed and manufactured by British engineers, and fitted with a premium-grade carbon activated cartridge, the Franke Triflow is a health-conscious and quality drinking water filtration system.

TRUST THE WATER YOU DRINK

The quality of tap water has never been under so much scrutiny. Increasingly, more and more people are questioning the source of their tap water, the treatment it has undergone, and resorting to bottled water or home filtration methods. By resorting to bottled water every person then adds to the ever increasing plastic pollution problem, adding to the already overflowing landfills across the country.

Wouldn't it be easier if filtered water were available on tap? With the Franke Triflow System, that's exactly what is provided. No more bulky containers of bottled water, purification tablets or filtration chemicals. Just a normal kitchen tap that dispenses hot, cold and perfectly filtered drinking water.

When used with the 3 sub-micron carbon activated filter system, the Triflow System has the ability to filter out chlorides, odours and sedimentation from the water. While being easy to install and maintain, the advantage of this filter system is that it does not 'strip' water of its goodness and retains beneficial minerals such as calcium and magnesium - essential for a healthy diet. All you have to do is change the Triflow System's filtration cartridge every 6 - 12 months. No chemical treatments involved, and as the Triflow System filters water on demand, there is not time for bacteria to develop like it does in pre-filtered water- such as a filter jug.

Of course, Franke Triflow Systems are much more than drinking water filters. Designed and patented in the UK, the Triflow System combines ISO 9001 accredited British engineering with safety components.

The Triflow System is manufactured within an ISO 9001 accredited environment.

5 Year Warranty on body construction

TRIFLOW - KUBUS

Features & Benefits:

- Carbon Activated Cartridge
- Water Purification Filter
- Dispenses Hot, Cold and Filtered Water
- Solid Brass Construction
- Chrome Plated
- Guaranteed for 5 Years on Body Construction

TRIFLOW FILTRATION KITS:

ZIP WATER PURIFICATION KIT

Product Code: 490114

KUBUS TRIFLOW KIT

Product Code: 821054

Includes:

- Kubus Triflow Tap
- Zip Water Purification Kit
- Male stud fitting with taper BSP thread

ZIP FILTER CARTRIDGE

Product Code: 490109

HOW DOES THE FRANKE TRIFLOW SYSTEM WORK?

Simple and easy to operate, the Franke Triflow System provides hot, cold or mixed supplies of water just like a straightforward kitchen tap. Select the tap's third handle however, and cold water is diverted through a compact filter cartridge to remove impurities. The water then travels back through a concealed and completely separate waterway, and out through its own spout. This means that the filtered water can never come into contact with the untreated hot or cold supplies.

Designed to filter out cysts such as cryptosporidium and giardia and reduce water cloudiness. The Triflow also inhibits the accumulation of lime scale and filters out chlorine and other chemicals present in the water supply to bring you better tasting water. This is done via the filters which are constructed so that the spaces between the fibres are increasingly smaller towards the inside of the filter. With this design the larger particles are trapped in the outer layers and the smaller ones towards the centre.
