Metal Ceilings

A photograph of a modern interior space featuring a white, grid-patterned metal ceiling. Several circular recessed lights are installed in the ceiling, some of which are illuminated. The ceiling is part of a larger architectural structure with curved white walls and a track lighting system. The overall aesthetic is clean and contemporary.

> OWAtecta® Metal Ceilings

Bringing performance in shape

OWA metal ceilings open up new designing possibilities with a fascinating building material. Standard tiles, linear panels, special formats, arched slab – combine creative styling of surfaces with outstanding acoustical, air-conditioning, hygiene and fire protection properties. OWAtecta® metal ceilings – performance in best shape. Ceiling solutions at the height of modernity.
