creating environments

The question of quality versus speed has always been a contentious one in interior design. Economics and demand require buildings to go up quickly and affordably, which can compromise quality. JUMBO® Plasterboard offers an alternative solution for internal walls and can be used for both residential and commercial ceiling applications, as well as walling and partitioning applications. JUMBO® Plasterboard is also used to form bulkheads, create curved ceilings, floating ceilings and radiused walls. An extremely versatile product which can accommodate innovative and creative design features. JUMBO® Plasterboard achieves the aesthetic requirements of the design without the necessary drying time for alternate wet trade solutions. All our JUMBO® products are compatible with our ceiling and partition systems by design.

Features and Benefits

- Quick and easy to install
- Durable
- Recyclable
- Versatile

In addition to these benefits JUMBO® Plasterboard is

- Lighter in weight than most other plasterboards
- Includes a fibre re-inforced core for added strength and flexibility
- Has a narrower taper which reduces the area required for jointing saving both time and costs further.
- Two boards are taped together protecting the face of the board

JUMBO® 7mm Plasterboard Square Edge

Recommended for residential ceilings when used in conjunction with our JUMBO® Suspension system an extremely level ceiling surface can be achieved.

JUMBO® Plasterboard is slightly thicker with added fibres improving both strength and flexibility. Orders and planning are simplified and handling and storage is easier on site as 7mm JUMBO® Plasterboard is stocked in 4 lengths and 1 width only.
