

ROBEX SPARTACOTE ALPENGLOW

Robex Spartacote's AlpenGlow metallic pigments are designed to be incorporated into commercial decorative concrete coating systems. It utilises synthetically produced aluminium platelets to produce beautiful colour intensity. The system is easy to install with only 3 coats being required and a next-day return to service.

AlpenGlow is available in a wide array of colours, including cobalt blue, copper, chrome, arctic ice, sunset and gunmetal grey.
