FEATURES

NEW SOLUTION FOR COLLECTING AND DRAINING THE SURFACE WATER!

FEATURES:

- Click the grating in and out, no screws required.
- Designed in accordance with EN 1433.
- Easy to assemble.
- The smooth waterproof surface allows a quick waterflow drainage.
- The external structure with ribs improves the anchoring between concrete and HDPE and is designed for a better strength and rigidity of the channel.
- High mechanical and chemical resistance.
- Lightweight.
- Easy to carry.

FIXING SYSTEM

CHANNEL PROTRUSION FOR FIXING

The gratings are well-fixed to the channels thanks to the protrusions in the channels themselves without using external elements like screws or nuts.

PIVOTS FOR CENTERING THE GRATINGS

Once the grating has been centered and fixed, its correct position on the channel is guaranteed by the pivots that can adjust any eventual in the channel dimension due to external agents.
