

THE ONLY REAL ONE

WWW.SUMMERPLACE.CO.ZA

Since its inception in 1968 as an upmarket swimming pool construction business, Summer Place has evolved into a trusted leader in the spa and bath market. For nearly half a century, the business has demonstrated its dedication to innovative design and superior quality.

LUSSO PORTABLE SPA

The Lusso Portable Spa has been specifically designed to offer the most in the least waste of space. A large footwell and a comfortable recliner make this completely self-contained portable spa a very popular option for those interested in a plug and play solution.

Capacity litres 1300 ltr

WEIGHT & SEATING DETAILS

Weight empty 350 kg

Weight full 1350 kg

Seating 5-6 persons

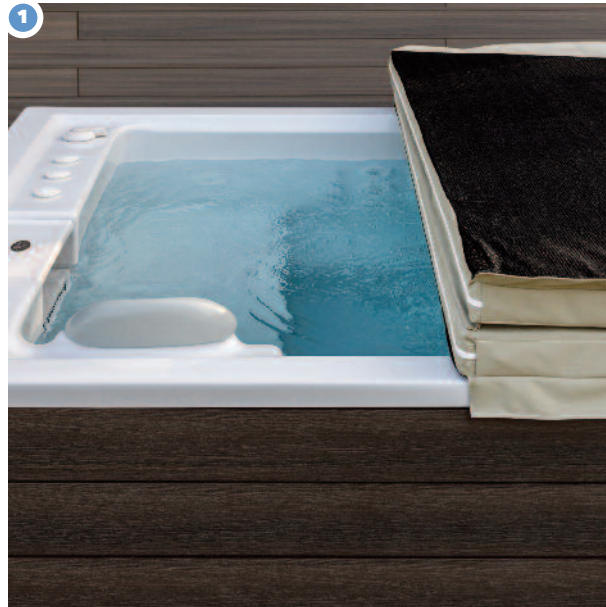

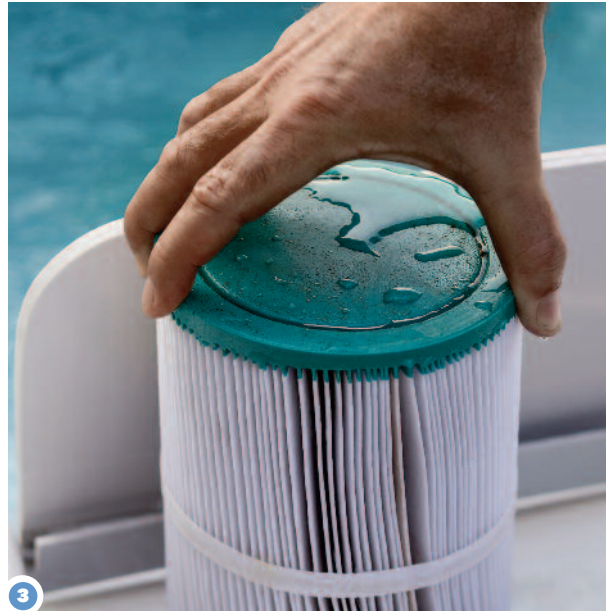

KEY FEATURES

LUSSO PORTABLE

- 1 Set in a NewTechWood composite timber surround that requires no maintenance and carries a 25-year limited warranty.
- 2 A small circulation pump and pre-set filtration cycles ensure filtration at the most strategic times ensuring maximum energy efficiency.
- 3 Filters load from the top and are easy to remove for cleaning purposes.
- 4 An ozone generator ensures healthy sterile water at all times.
- 5 20 jets, including the 12 micro-jets, provide 'Shiatsu or Fingertip' type massage as well as the massively powerful P30 centre-air induction jet.
- 6 Digitally controlled temperature settings.
- 7 Deep seating with a large footwell and a lounge ensures comfort for five adults.
- 8 Underwater LED blue-light creates a beautiful ambiance at night.
- 9 Draining of the spa is via a lay-flat hose (stored behind one of two access doors) that simply rolls out to the nearest drain. Filling is achieved with a simple garden hose.

INSTALLATION

Installation of the Lusso spa is quick and simple. All you need is a level, stable surface, an appropriate electrical supply and a garden hose. And unlike other home additions, its portability is a huge asset. The spa is not a fixture of the house, it belongs to you, so you can take it with you when you move.

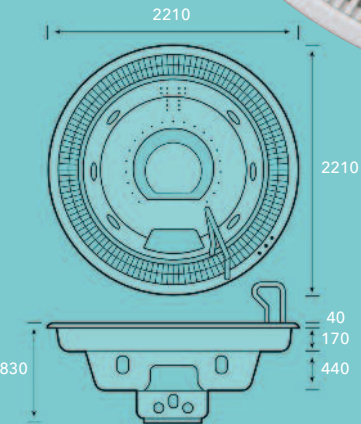

MINI GEMINI FLUSHDECK

This circular design softens any outdoor area and the Flushdeck's overflow feature ensures no spillage and water loss regardless of the number of people inside the spa.

KEY FEATURES

- 1 6 x P30 Jets
- 2 Vertical air system
- 3 Low voltage touch buttons
- 4 12 micro-jet 'Hotseat'

Centre-air jets

introduce air into the centre of the incoming water stream, at a rate of 90 litres per minute, and deliver up to three times more air than conventional systems.

Summer Place centre-air jet nozzle

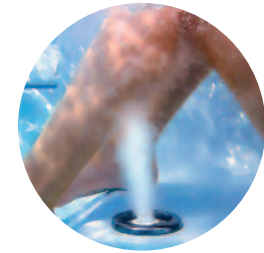

Other spa and bath nozzles

HYDROTHERAPY

The patented Summer Place **centre-air induction jets** have long since been considered groundbreaking in their ability to deliver a comfortable, yet deep penetrating hydro-massage, via a stream of water combined with air. 'The air serves to soften the force of the water - dispersing what would otherwise be a penetrating and uncomfortable stream of water,' explains Glenn Varrie, Marketing Director of Summer Place Spas and Baths.

These state-of-the-art jets are used in all Summer Place Spas and are acknowledged worldwide as 'the jet design' that delivers the most effective deep tissue massage of any spa jet on the market. 'Due to the air being induced into the centre of each jet, the system allows for three times more air flow than any other jet.'

THERAPY FEATURES

Research has shown that hydrotherapy is more effective than infra-red lamps and heat pads, and accelerates the healing of injured or exercised muscle tissue.

Long-term bed patients with circulatory problems benefit most through hydrotherapy because lymphatic fluid reaches the cells more quickly,

which means that minerals and vitamins reach their destination sooner. In turn, the removal of waste products and toxins is accelerated.

Another side to hydrotherapy, which cannot be evaluated scientifically, concerns the effect on the mind. The luxurious, warm water helps build relationships, encourages togetherness and forces you to relax. The stresses and daily tensions float away leaving a wonderful feeling of well-being.

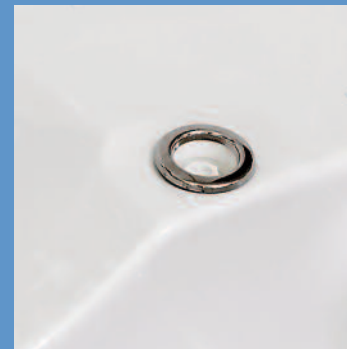

POWER FLO THREE CLUSTER

Tension relief massaging trapezius upper shoulders and firm back massage. Powerflo 3-cluster with directional water flow and pressure adjustment, with variable air pressure mix for your every need. Ideal for shoulders, quadriceps, stimulation and toning for suppleness.

HOT SEAT

Para spinal muscles and meridian flow channels. A merging of Japanese custom and Chinese culture resulted in a method called Shiatsu, or 'Fingertip pressure'. When practiced correctly Shiatsu can restore and maintain the equilibrium and rhythm of the body's energy flow. Twelve micro-jets designed to do just that at variable pressure.

VOLCANO JET

Quick recovery and supple massage at variable water/air pressures: 150 litres per minute flow rate for firm wide area deep sport's massage to hamstrings, thighs, calf muscles and quadriceps.

P30 CENTRE AIR INDUCTION JET

This is the industry's premium jet unit that due to its massive air flow delivers an extremely powerful but safe massage.
