Roller Blinds Finish Option Glossary

Roller Blind Screen Shades are referred to as sheer weave shades, solar shades, or screen shades. They are not privacy shades but rather fabric window shades that are used to block UV rays and reduce energy costs whilst not block the view as you are able to see through them.

A hybrid between both Screen and Blackout, our light filtering fabric shade filters and reduces the amount of light that enters a room. Neither blackout nor a sheer screen, with a transparent coated finish, this fabric is an ideal solution for moist and humid room environments and climates.

Blackout is an opaque fabric used to black out light. Blackout fabrics are most commonly found in bedrooms and hotel rooms, blocking much of the light that would otherwise enter through a window when the curtains are closed. For travellers, light sensitive sleepers and parents of babies, blackout is an essential element in the bedroom.

C-SCREEN

Simple & practical.

Screen fabrics are the perfect solution for controlling light and heat. Our screen fabrics are flame-retardant and proven safe for people and nature. This unique screen collection offers possibilities to create a custom-made interior shading plan, meeting the different light, view and acoustic requirements in one building, in the same uniform look and color. The collection offers 7 colours, each available in an openness factor of 5%.

TECHNICAL SPECIFICATIONS

Openness Factor:	5%
UV Blockage:	95%
Material:	25% Polyester, 75% Vinyl on Polyester
Weight:	480g/m ²

TECHNICAL FEATURES

- Bacterial & fungi resistant
- Automated or manual
- Fire retardant

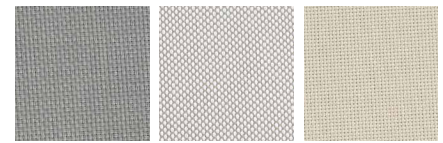

AVAILABLE COLOURS

Ebony

Bronze

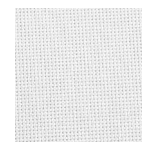

Iron Grey

Soft Grey

Chalk Soft Grey

Grey Sand

Chalk

SHEERWEAVE

Sunscreen fabric.

Our Sheerweave fabric is a revolutionary screen, manufactured using DOW ecolibrium bio based plasticizers, rather than fossil fuel based plasticizers. DOW ecolibrium does not detract from the screen's appearance or performance, and provides a sustainable green alternative to traditional screens, without a PVC fragrance. The application of this treatment also means it will protect and defend your fabric against bacteria, mould, fungi, yeast and algae.

Sheerweave White Grey

TECHNICAL FEATURES

Low carbon footprint

Fire retardant

Glare and heat reduction

Good UV control

Printable

Easy to clean

Antimicrobial treatment

Automated or manual

TECHNICAL SPECIFICATIONS

Openness Factor: 5%

UV Blockage: 95% approx.

Material: 25% Polyester,
75% Vinyl on Polyester

Weight: 488g/m²

Eco-friendly: 50% of compound components derived from crop based feed stocks & minerals while 2/3 of total compound is derived from non-fossil fuel based feed stocks

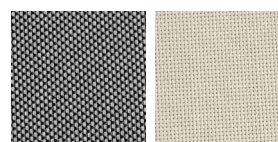

GREENER

- Made with bio based plasticizers
- Low carbon footprint
- Reduces the need for airconditioning

SAFER

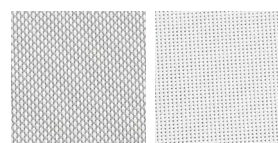

- Microban anti-microbial treatment preventing growth of bacteria, mould and mildew (makes fabric easier to clean, keeps clean between cleans).
- Cleanguard Gold, low VOC, no harmful emissions
- Flame retardant to international standards
- Free from lead phthalate and formaldehyde

B-RANGE

Room dimming and light filtering.

A step above sheer! Light filtering means that plenty of sunlight will come in, but no one can actually see in. At worst case scenario when you stand close to it you can see a shadow. Light filtering means that it is private. Transparent coated finish with a light fastness of between 4 and 6, make this roller blind fabric suitable for all room conditions, including moist environments such as bathrooms and coastal homes. Our B-Range fabric is ideal for those who are not wanting to have much outward visibility through the blinds, nor have the blackout effect. Our 100% Polyester B-Range is available to order in 10 contemporary colours.

TECHNICAL SPECIFICATIONS

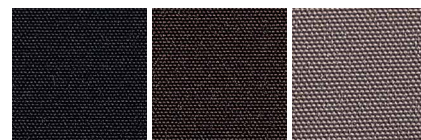

Material: 100% Polyester

Weight: 210g/m²

LE REVE

Blackout that's good to look at.

Le Reve brings elegant texture to the Taylor Blinds fabric collection, making this blackout blind an ideal feature in your home or office. Le Reve provides a high-quality atmosphere for your interior due to the fabric textures and effect when the blinds are closed.

The contemporary colour offering is inspired to match both classic and modern interiors. A perfect solution to create a stylish, warm and rich setting. Our Le Reve Roller Blinds are also suitable for wider windows. Our Le Reve range has a foam coated acrylic backing on the reverse side of the textured interior facing fabric.

Aluminium 25mm in Nordic White

WOODEN VENETIAN BLINDS

Classic taste for all seasons.

Offering natural style and beauty, made-to-measure wooden Venetian blinds are a classic window treatment that compliment the popular trend for wooden flooring and furnishings within the home. The wooden Venetian blinds from Taylor are made from Basswood, resulting in a durable and light product for your window dressing.

Wooden Venetian Blinds in Oak

Whether you are looking to frame the window of a bedroom or an office; if your décor is functional and minimal; cottage-style or you have a collection of antiques, wooden Venetian blinds will complement your décor.

Taylor's wooden Venetian blinds are sourced from renewable plantations in the Far East where, the Bass wood is UV treated and undergoes a kilning process to stabilise its properties. The blinds are available in 50mm slats and a wide variety of subtle hues, colours and textures.

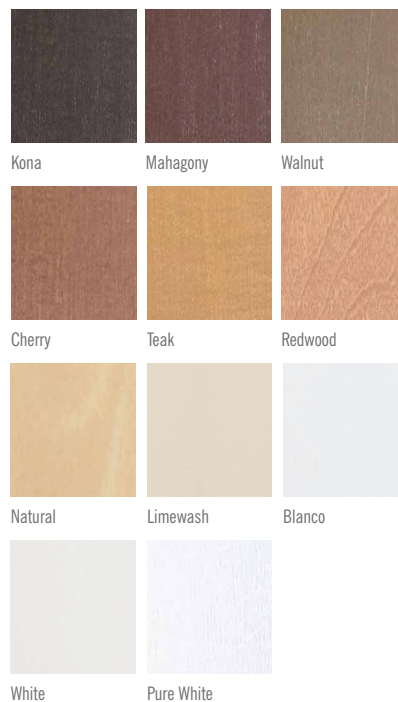

Venetian blinds are extremely versatile when it comes to controlling the light that enters a room: you can guide light in; you can block light completely by closing the slats; you can raise the blind to leave the window clear; close for privacy or tilt for diffused lighting.

We also offer a wood substitute Venetian blind – the Styro-Wood – made from a polystyrene resin base is an ideal choice for bathrooms or damp areas.

TECHNICAL FEATURES

-  Lightweight and easy to pull up
-  Short stacking height
-  Cords, tapes, head and bottom rails are colour co-ordinated
-  Wood has a special UV protective coating

AVAILABLE COLOURS

STYRO-WOOD VENETIAN BLINDS

Versatile and practical.

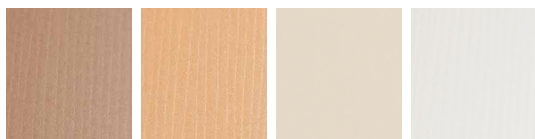

Our wood substitute Venetian blind - Styro-Wood - made from a polystyrene resin base offer the benefits of a wood-look product without the characteristics that come due to the nature of wood (warping, fading), and can be installed where a real wood product may not be suitable (such as a moist, humid or damp area or climate). Due to the PVC composition, Styro-Wood Venetian blinds can be used in bathrooms and kitchens without the worry that the slats will warp when wet.

Available in white, cream and brown with slat widths of 50mm. An easy to clean and maintain product for your room of choice.

These durable Venetian blinds offer you a variety of solutions for your décor needs.

AVAILABLE COLOURS

Cedar

Oak

Alabaster

White

TECHNICAL FEATURES

-  Lightweight and easy to pull up
-  Short stacking height
-  Cords, tapes, head and bottom rails are colour co-ordinated
-  Styro-wood range is suitable for use in damp areas (e.g. bathrooms)
-  Easy to clean

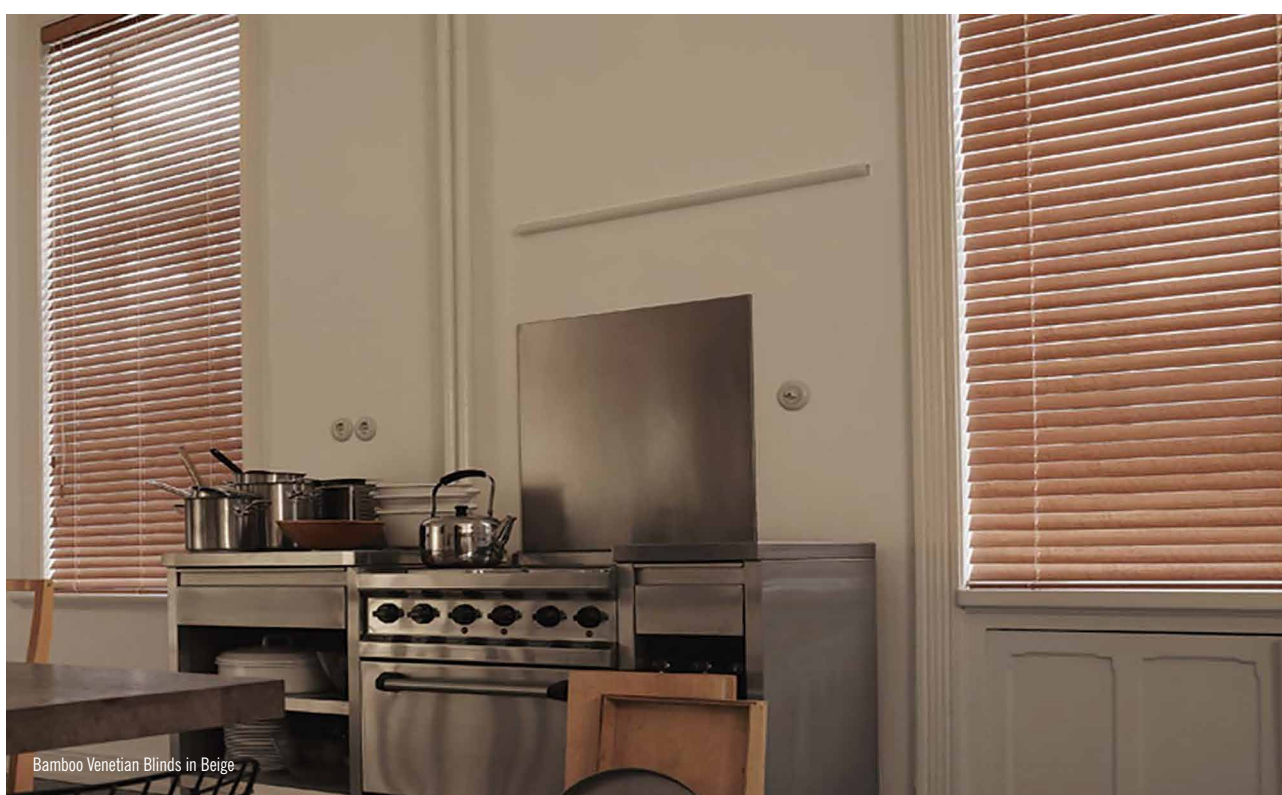

BAMBOO WOOD VENETIAN BLINDS

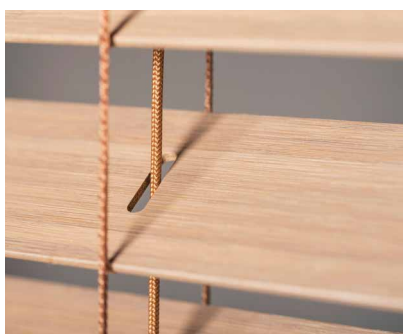

Inspired by nature.

Bamboo Wood Venetian Blinds offer many unique design benefits: they lend elegance to almost any room décor and their durability makes them reliable as they fulfill the functions of the traditional blind with little to no maintenance.

Bamboo Wood Venetian Blinds are eco-friendly and this, many agree, is a big part of the natural ambiance that bamboo blinds lend to a room. The natural elements of bamboo make it a perfect material for use in the manufacturing of window covering products. They are deceptively durable (it may look delicate, but it is surprisingly resilient), and can withstand sunlight for extended periods of time. Our Bamboo Wood Venetian Blinds are perfect for creating a serene and nurturing environment with a touch of robustness and elegance.

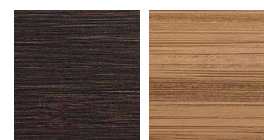

Bamboo Venetian Blinds in Beige

ALUMINIUM VENETIAN BLINDS

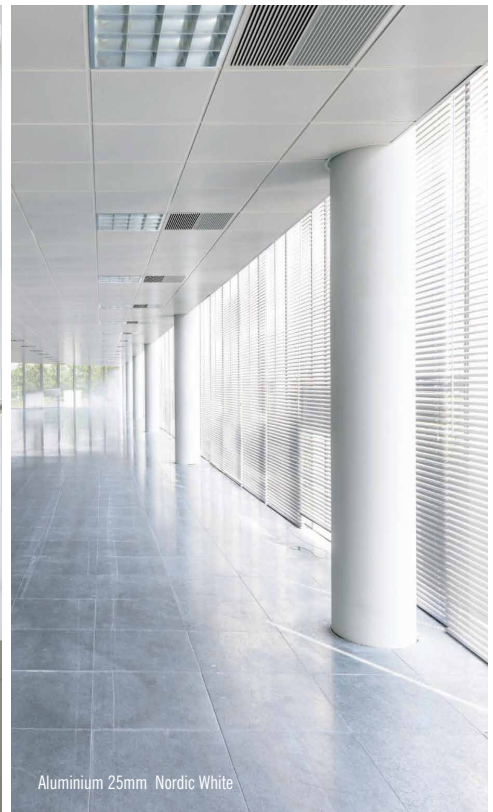

Art deco – on trend again.

Our modern range of made-to-measure Aluminium Venetian Blinds offers a huge choice of colours, finish effects and trend-led designs like our range of wood-look aluminium blinds.

This carefully selected range has something to suit all rooms within the home or workplace, giving excellent light control with a stylish blind product. Our custom-made Aluminium Venetian Blinds ensure a perfect finish to your new window dressing.

Aluminium 25mm in Nordic White

Aluminium 25mm Nordic White

Choose from two different slat widths:

Taylor offer both 25mm and 50mm aluminium blind slat widths from which to choose. Stainless steel pins are used to ease the cord pull, which means they won't corrode, rust or damage the cords. The benefit of blinds is that they leave you with an unobstructed view when you raise them completely.

TECHNICAL FEATURES

-  Lightweight and easy to pull up
-  Short stacking height
-  Cords, tapes, head and bottom rails are colour co-ordinated
-  Rust Proof
-  25mm and 50mm slat widths

VERTICAL BLINDS

Sleek. Simple. Classic.

Vertical blinds are the most common choice for offices although their sleek look is making them more popular in homes.

They work with any size window or patio door – parting left, right or stacking in the middle – and their perfect straight lines allow you to control the light that enters a room, your privacy and your views.

They are easy to clean and offer insulation against heat and cold. The washable fabric strips are available in widths of 90mm and 127mm and are available in a variety of colours and textures to choose between: from screen and patterned fabric to a PVC blockout option. Our patented stainless steel rods will not corrode and ensure years of trouble-free service.

TECHNICAL FEATURES

WOVEN BLINDS

A touch of the East.

Woven bamboo and woven wood bring the outdoors, indoors. With slats of bamboo or wood, rich in texture, warm in appearance, our custom natural woven blinds filter light softly, subtly and naturally. Making them ideal for any decor environment.

The blinds are woven with the slats acting as the weft in a warp of strong string. Woven blinds are timeless favourites. Various slat widths and colours are available and each unit is Taylor-made to your requirements.

Designed to roll up from the bottom, these woven blinds naturally softly diffuse light from outside to create a calming ambience.

MOTORISATION

Privacy at the touch of a button.

Designed to provide convenience, comfort and energy savings, Somfy's automated solutions are an important enhancement for homes and commercial buildings. At the push of a button, or automatically, they will open or close, providing shade and privacy.

Motorised blinds add a level of ease and convenience with the touch of a single button.

Blinds are an essential addition for home and office as well as for energy savings. Your windows release a lot of the temperature from within a home or office building - heat in the winter and coolness in the summer. Electric motors for interior shades or blinds are easy to operate and work smoothly to keep your window coverings beautiful and functioning longer.

Please speak to your sales representative to investigate the automated solution best required for you.

QUALITY. INNOVATION. TRUST.

WHO ARE WE?

For close on 60 years Taylor has been synonymous with providing service excellence and innovative, elegant, quality products. Whether it is stylish aluminium or wood-substitute shutters, contemporary security gates, the streamlined simplicity of venetian, vertical, roller or woven blinds. Taylor has the perfect solution for your home or office.

Taylor innovation is savvy – merging design and functionality to provide stylish, elegant and practical window and door covering custom made solutions.

WHY WE'RE DIFFERENT?

We know everyone has unique tastes so we work alongside home owners, designers and architects to provide Taylor-made-to-measure, locally manufactured, top quality products that are delivered and installed within our committed time frame to you.

We pride ourselves on our quality and service and offer a warranty on all products manufactured in our factory, that they will be free from defects in material and workmanship, for a set period ranging from 2 to 10 years from date of delivery. This warranty is given subject to certain conditions.

QUICK TURNAROUND

We have an 8000m² purpose-built factory and are able to manufacture within a maximum of two weeks from signed off order*. Our service ethic includes the highest quality control which is why we confidently offer 2 to 10 year warranties, depending on the product.

SECURITY WITH STYLE

ShutterGuard® – the industry leading security shutter – made from aluminium, does the job of stylish shutters and burglar bars in one. Our Durador® security doors are elegant but tough. So, if you want to secure your home or office space with safety, without compromising on style, you've come to the right place.

Contact us and we will measure, advise and present you with our range of products and colour options that will complement and enhance your décor.

*Excluding delivery which requires 5 working days.
